W. N. SCARFF & SONS - NEW CARLISLE, OHIO.

For the Vegetable Garden

TOPEPO

A New Vegetable

This distinctly new creation is the result of a cross between the Bell Pepper and the Stone Tomato and Combining the characteristics of both parents. The Topepo is about the size of a large flat tomato but has retained the regular bulges of the pepper. The colors are beautiful waxen yellow and red. The flavor resembles the Bell Pepper but is sweeter, very mild and has some of the zest of the tomato flavor. The Topepo has been grown for several years on the west coast and has gained great popularity. In our own garden we were more than pleased with the Topepo. The plants were thrifty growers and set heavy with the fruit which started to ripen late in August and continued to mature until after several heavy frosts. We shared them with our neighbors and we all enjoyed them in sandwiches with meat, salads, flavoring soups, dressings, and gravies and found them greatly superior to the pepper for stuffing and baking because of their beautiful color and the firm thick walls which do not break down when baked.

You'll find the Topepo not only an interesting novelty but a fine addition to your home garden and very profitable to grow for the market. It requires quite a long season to mature so set the plants out as early as possible.

Price per packet, 25c; 5 packets, \$1.00.

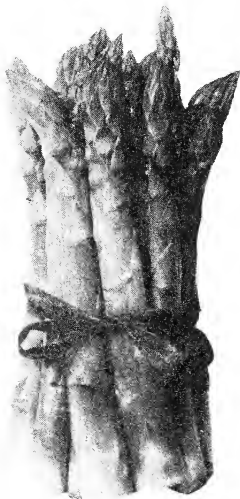

Topepo

The New Washington Asparagus

COLORED LEAFLET ON ASPARAGUS CULTURE FREE

This new variety of Asparagus is practically rust proof. It is a vigorous high yielding strain of Giant Asparagus and a most profitable crop to grow for market. As a variety for the home garden it has no equal. No other vegetable can take the place of Asparagus. It is ready to cut for the table so early in season and continues over a long period of time. It is nutritious and healthy being rich in vitamins so essential to good health. If you already grow Asparagus then add this new and wonderful variety to your collection. If you do not have a bed of it growing then do not let another year go by without planting. We are offering the roots very low so all may get a start at once. Price, 75 cents per dozen, postpaid; \$2.50 per 100; \$20.00 per 1,000.

New Washington Asparagus

Mary Washington

This is a strain selected from the Washington variety. It produces a much heavier stalk and the canes are more numerous than the original Washington variety. Like its parent it is practically rust resistant. Mary Washington will make you the most money as a market variety. We can supply this stock at 75 cents per dozen; \$3.00 per 100; \$25.00 per 1,000.

Other Varieties

GIANT ARGENTEUIL, PALMETTO, CONOVER'S COLOSSAL AND BARR'S MAMMOTH. The standard market sorts, all green and tender. Price, 75 cents per dozen, postpaid; \$2.00 per 100; \$12.00 per 1,000; by express or freight.

Choice Rhubarb

COLORED LEAFLET ON RHUBARB CULTURE FREE

People are just beginning to realize the great profit in the culture of Rhubarb in the open field, also as a forcing crop for winter. It yields enormous profits. Anyone can succeed, as the culture is very simple.

Linnaeus

Large, early, tender and fine. The very best of all. 20 cents each; \$2.00 per dozen, postpaid; \$8.00 per 100.

Holt's Mammoth Sage

Plants of strong growth, of unusual substance, strong flavor and of superior quality. Prefers a rich, moist loam. Price, 10 cents each, \$1.00 per dozen, postpaid. Large clumps by express, not prepaid, same price.

Rhubarb

Horseradish

Maliner Kren

This new variety makes an enormous yield and is so early that it can be marketed before the common kind is ready; besides the roots are much larger and whiter. The roots sell in market at 5 to 10 cents per pound. It is easy to grow; every plant will live and is ready sale on any market. Price of good roots, 75 cents per dozen, postpaid; \$2.00 per 100; \$15.00 per 1,000.

Common Horseradish

This useful condiment is easily grown, and prefers a rich, moist loam. Price, 50 cents per dozen; \$1.50 per 100; \$12.00 per 1,000.

Our Page of Greeting

MAX M. SCARFF

W.N. SCARFF

HOWARD N. SCARFF

Once again we bring our message to you through the pages of our Catalog. We do not have opportunity to personally talk to many of you and to tell you the merits and characteristics of the plants, seeds and other items that we are offering. However, it is with a great deal of pleasure that we present you with this little booklet, a descriptive miniature of our Nursery, Fruit, Live Stock and Seed Farms.

The past year has been a busy one here on our Farms. We have produced an unusually fine lot of fruit plants that are well rooted and will come into bearing at an early age;—and the person who had a well kept planting of either berries or tree fruits this year was very fortunate as prices on good fruit were unusually good throughout the season.

We have installed a new method of drying our seed corn this season consisting of special ventilating and fan equipment, that air at normal temperature might be forced over the corn to insure thorough drying. This is simply an added protection and is the most scientific method of caring for seed to insure the strongest possible germination. We have hand selected and racked thousands of bushels of the various varieties offered you. We have added a new special corn grader that the sizing of grains may be more efficient, and every lot of seed sold is carefully and thoroughly tested. Our fields are each season inspected by the Ohio Seed Improvement Association.

We carry a complete line of Grass Seeds, offering only the very best grade of verified origin, and tested seed, in sealed bags, except where broken lots are ordered. You know the necessity of good seed and we are glad if we can help you secure only the very best.

The widespread movement toward better home beautification has created an increased demand for Ornamental Shrubs, Trees and Evergreens and we are prepared to supply a heavy grade of these plants in the most desirable varieties.

Our Farms containing over 1400 acres are located in the heart of the fertile Miami Valley. They are kept in a high state of fertility by the use of barnyard manure, green manure and commercial fertilizer. Throughout the year we employ a trained force of men who are continually striving to better the class of stock we are offering.

Since the humble beginning of the business 36 years ago our aim has been "Service and Complete Satisfaction to our Customers" and this policy is still the backbone of our institution. If you are unable to pay us a personal visit we hope you will send us an order by mail as these orders receive our same careful attention and we will make delivery at the proper time to plant.

W. N. Scarff & Sons - New Carlisle, Ohio

A Fruiting Patch of Raspberries on the Scarff Farms.

Small fruits are one of the most profitable crops that can be grown. They are easily cared for and will always bring good substantial profits.

Mastodon

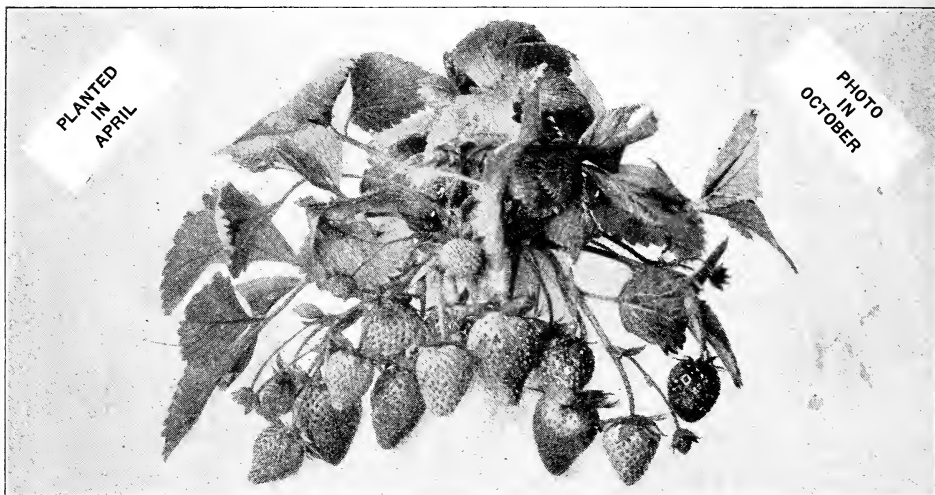

The Wonderful New Everbearing Strawberry

Mastodon, the great strawberry found in Indiana a few years ago, has stood the test in every section of the United States this season. It is now widely distributed and favorable reports come in from everyone who has grown it.

In some places it is said this giant of the berry family produces three or four times as much fruit in a season as any other variety.

Here is a new giant everbearing that will start to produce an abundance of good fruit within three months after planting and continue to bear fruit until frost. The Mastodon has proven itself far superior to other everbearing varieties in many ways:

1. Fruit is almost double the size of the common everbearers.
2. Produces a heavy crop in the spring and another in late summer and early fall. Other everbearers yield only a fair crop in the spring.
3. Plants are more thrifty.

New Mastodon Everbearing Strawberries

NEW MASTODON EVERBEARING STRAWBERRIES

PRODUCES AN ABUNDANCE OF FRUIT THE FIRST SEASON.

The above photo was taken of a Mastodon Strawberry which was planted in April, 1927, and bore its first ripe berries in September. The photo was taken the latter part of October, the same year, and shows a fine crop of delicious fruit.

Mastodon is the most desirable Everbearing Strawberry ever produced. Price, New Mastodon Everbearing, \$1.00 per dozen; \$3.00 per 100, postpaid.

PROGRESSIVE EVERBEARING STRAWBERRY

The Progressive for a number of years was considered the standard of Everbearers, and the berries are still probably the finest quality and sweetest of all Strawberries. They are delicious when eaten fresh and are very suitable for canning purposes. Price, 75c per dozen, postpaid; \$2.00 per 100; \$15.00 per 1000 by express.

CHAMPION EVERBEARING STRAWBERRY

The new Champion will produce a good crop the first season it is set. The next year it will produce an abundant spring crop followed by a continuous setting of fruit throughout the season. Commercial growers are planting the Champion as it is superior to the spring varieties in that it is a sure cropper. If the first set of bloom is killed by the frost, new blossoms will form and produce, a heavy setting of fruit; whereas, such a freeze to a spring variety means a total loss for the year.

Description. The Champion is a true everbearer, producing fruit on both the old and the new plants. It somewhat resembles the Progressive, but it is a much heavier cropper, stronger grower, better plant maker and the fruit is even of higher quality. We strongly recommend the Champion for either commercial or garden planting. Price, 75c per dozen, postpaid; \$2.00 per 100; \$15.00 per 1000.

Strawberries

Wherever you have a few feet of space in the garden you can plant Strawberries and feel well repaid by having an abundance of their delicious fruit in season. You will find that your home grown fruit, that can be picked absolutely fresh, has a much finer and sweeter flavor than the shipped fruit or that picked several days before being eaten.

Any good rich soil will grow Strawberries. Plant them in rows about 1½ ft. by 2½ to 3 ft. apart. Keep the soil well cultivated and hoed the first year and when the ground freezes up in the fall put on a medium to light mulch of straw or leaves.

The New
"Daddy Leman"

LEMAN (Per) "Daddy Leman", as it is sometimes known by the growers in this section, is a new variety with outstanding merits, especially for commercial planting. The fruit is large and striking in appearance and our growers have been getting at least \$1.00 more per 24 quarts crate for this Daddy Leman than any other standard varieties. Berry is large, very attractive, moderately long, somewhat flattened near the point and ripens evenly throughout. It is firm flesh and moderately tart in flavor. One of the best for preserving. The plants are individually strong with dark green foliage and producing just enough runners for a good fruiting row.

The Leman originated here in Clark County, Ohio, as a chance Seedling 8 years ago and has been fruiting for the past 6 years. It has created such admiration among the Commercial growers here that we have decided to offer it to the public at a very reasonable price for trial in other localities. After you have fruited the Leman we will be glad to have you let us know what it does for you.

SEE BOTTOM OF PAGE FOR

PRICES ON THE LEMAN

SCARFF'S SEEDLING

firm enough for marketing but the flavor of the berries is most desirable—sweet and almost melting in your mouth. It is a strong grower, endures dry unfavorable weather and is very prolific of very large, sweet juicy berries.

(Per). This variety is recommended for planting in the home garden for table use. The fruit is hardly

Market gardeners plant their strawberries under irrigation and find it their most profitable crop. The sprinkling systems also act as frost protection in the spring, so the strawberry can always be depended on as a sure money crop for these growers.

Strawberries

PREMIER (PER). The Premier is one of the most popular varieties that we offer and it well deserves all the praise that can be given it, for several reasons;

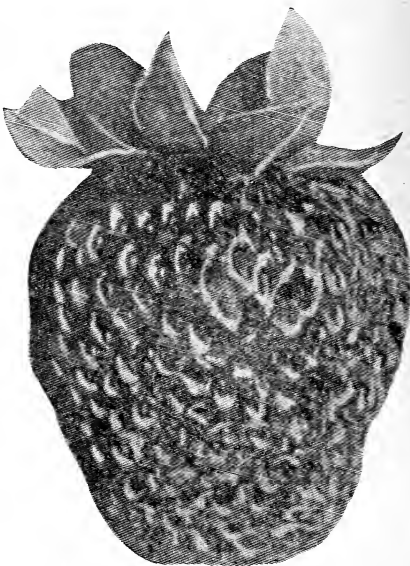

1. Premier is among the first to ripen.
2. Fruit large size and deep red color.
3. Firm and very good flavor.
4. Heavy yielder and makes thrifty growth.

We unhesitatingly recommend the Premier for either home or commercial planting.

COOPER (PER). Following the Premier in ripening, the Cooper is a remarkably new variety that promises to become a leader in the "Large Berried Class." The fruit is uniformly large, exceedingly sweet, ripening evenly without green tips or hollow core. Starts to ripen quite early and continues over a long period. Plants are exceptionally strong growers, making hills nearly as large as a bushel basket. The fine root system enables it to produce a good crop even in dry, hot seasons. You will be more than pleased with the heavy crop of large, fine-flavored berries produced by the Cooper. You should not fail to get a start of this wonderful new variety.

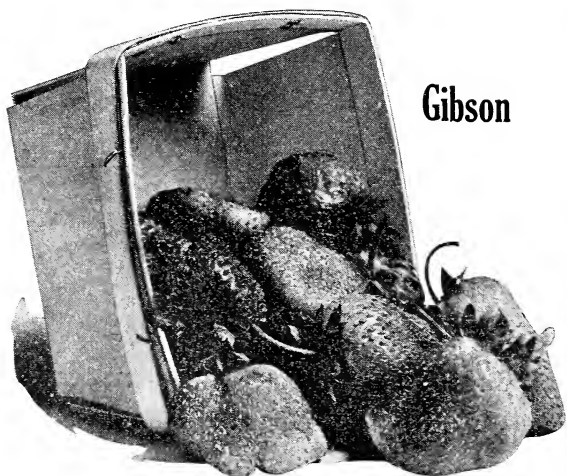

DR. BURRILL (IMPROVED DUNLAP) (PER). One of the finest medium early varieties grown. Dr. Burrill closely resembles Dunlap, which is conceded to be one of its parents. A strong, vigorous grower and a heavy yielder even under quite adverse conditions make this variety a valuable one for the commercial grower or for home garden. You will make no mistake in ordering Dr. Burrill. We are offering a fine lot of these plants that are strictly true to name.

AROMA (PER). Three varieties stand out pre-eminently as profitable for late season—Aroma, The New "Daddy Leman" and Gandy. The Aroma is one of the finest market varieties especially for the Central and Southern Sections. It makes a fine plant growth and produces large handsome fruit of bright red color, uniform, firm and good quality. A reliable variety and a heavy yielder.

Cooper

GIBSON (PER). Is sometimes referred to as the "Standard of Excellence" both for commercial and home growing. Besides being a beautiful appearing fruit of large size and deep red color extending clear to the heart of the berry, it has gained its popularity largely because of its wide adaptability to soil and other conditions. It is a great plant producer and the vines are simply loaded with berries. The flavor is as fine as can be found anywhere, making it in demand for either table use or canning purposes.

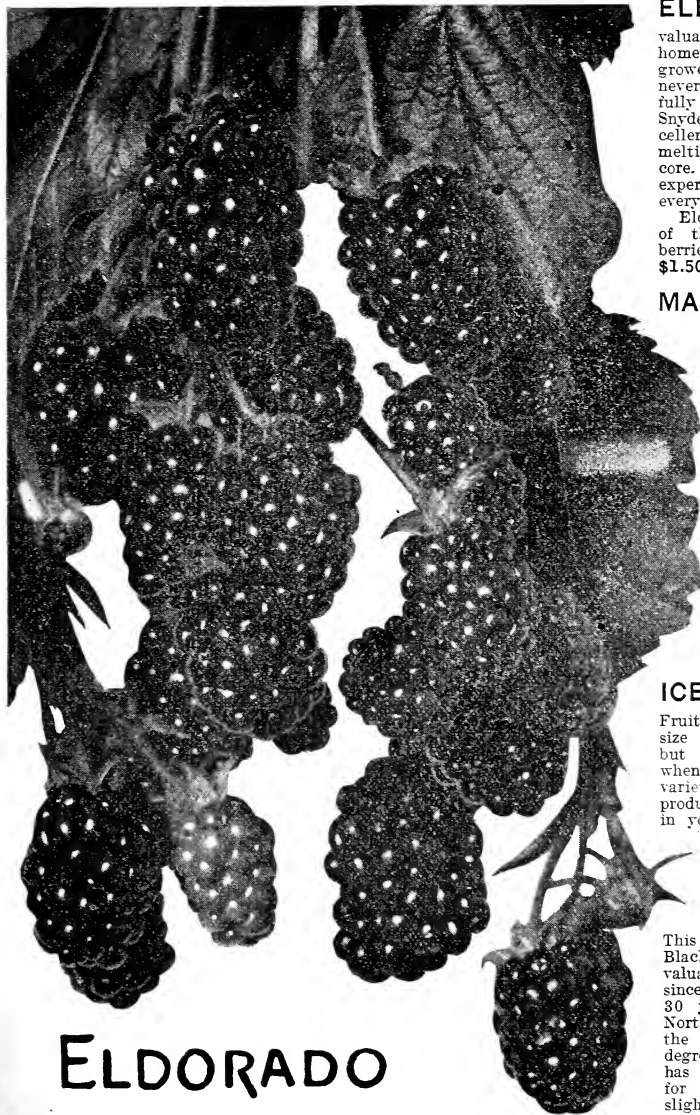

Gibson

There is always demand for Haverland, Warfield, Tennessee, Pokomoke, Chesapeake, Dunlap and Gandy. These are long standard varieties of merit. We can supply them true to name at prices listed on Page 3.

See Page 3 for Price on Strawberries

Blackberries

We excel in growing fine Blackberry plants. Our assortment is perhaps the largest of any grower in the United States. Our plants are heavy fruiting strains, and as fine as can be grown. You make no mistake in ordering your Blackberries of us, as both our price and stock are right. Our plants will make you big money.

ELDORADO

It is exceptionally sweet, rich, melting and luscious, being without core. Its season is early in midseason, ripening with the Snyder, but not so early as the Early Harvest. A standard variety; one of the best. Price, 20c each; \$1.50 per dozen; \$5.00 per 100; \$40.00 per 1000.

JOY Fruit of the Joy ripens about midseason; coal black in color and nearly as thick as long. Flavor is very rich and delicious. It is a good, strong grower, hardy and productive. You will surely want to try some plants of this fine variety. Price, 20c each; \$1.00 per dozen; \$4.00 per 100.

ELDORADO This is one of the most valuable varieties for market and home use. It is a strong, upright grower and the fruit is jet black, never coloring red after picking; fully as large again as the average Snyder berry. The flavor is excellent, imparting a rich aroma, melting and juicy with but little core. Highly recommended by experiment stations and growers everywhere.

Eldorado is unquestionably one of the best commercial blackberries grown. Price, 15c each; \$1.50 per dozen; \$4.00 per 100.

MACATAWA Plant this variety for highest quality and productivity. The large jet black berries are sweet, juicy, entirely coreless and almost seedless. The excellent flavor and extreme productivity of the Macatawa have made it one of our most profitable varieties. The canes are strong, upright growers, hardy and very prolific. The fruit is produced over a very long season, making it an especially valuable variety for home use or local market. Price, 20c each; \$1.50 per dozen; \$5.00 per 100; \$40.00 per 1000.

ICEBERG THE WHITE BLACKBERRY. Fruit creamy white and about the size of Snyder; sweet and with but few seeds. Produces best when planted with some other variety. Plant is strong and very productive. Plant some of these in your garden and you will be delighted with the fruit. Price, 20c each; \$2.00 per dozen.

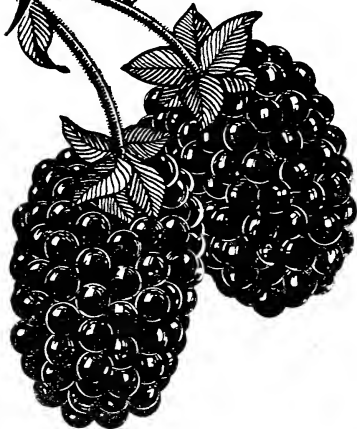

MERSEREAU

This early mammoth, iron-clad Blackberry is by far the most valuable variety that has appeared since the advent of Wilson, over 30 years ago. It originated in Northwestern New York, where the mercury falls from 15 to 25 degrees below zero, and where it has stood in open field culture for many years without the slightest protection, never being injured in the least. In quality,

	Each	Per Dozen	Per 100
SNYDER—An old favorite.....	\$0.15	\$1.00	\$4.00
EARLY KING—Early—large fruiting.....	.15	1.00	4.00
RATHBUN—Large jet blackberries.....	.15	1.50	5.00

Blower

BLACKBERRY.

BLOWER

The Blower has been an outstanding favorite among fruit growers for several years. It is deserving of this high esteem for several reasons, namely: It produces very large fruit almost the size of Dewberries; berries are jet black color and delicious flavor; Blower is one of the most productive varieties in cultivation, begins ripening in July and continues until September. It always sells for highest market price. If you do not have this valuable variety we hope you will try it. This variety is very popular among New York growers. It is claimed that 27 Blower berries filled a quart box and the yield was fully 50 per cent larger than any other variety. Price, 20c each; \$2.00 per dozen, postpaid; \$6.00 per 100; \$50.00 per 1000.

EARLY HARVEST

EARLY HARVEST

150 bushels of "Scarff's Fruiting Strain Early Harvest" from one acre sold as high as \$4.00 per bushel. The earliest to ripen and the most productive of the early sorts. There are a number of different strains of Early Harvest Blackberries, all alike in appearance of wood and growth, but vastly different in productiveness. We noticed this peculiarity soon after its introduction, and have, by careful system of selection, selected a strain that is simply marvelous for great yields of luscious fruit. We have not only increased the productiveness, but size as well, and now have an early variety that cannot be excelled, as it ripens so early that it always sells at enormous prices. Price, Scarff's Fruiting Strain Early Harvest, 20c each; \$1.00 per doz.; \$4.00 per 100; \$30.00 per 1000.

DEWBERRIES

We are just beginning to realize the great value of Dewberries. Plant them for profit. Plant them for home use. Their large size, sweet, delicious flavor and fineness of texture are practically unexcelled.

LUCRETIA DEWBERRY

The berries are far larger and incomparably better than any blackberry and of unequalled excellence; soft, sweet and luscious throughout; of brightest glossy black color. Price, \$1.00 per dozen; \$3.00 per 100; \$25.00 per 1000.

AUSTIN DEWBERRY

Earlier than Lucretia, same size. Price, 15c each; \$1.00 per dozen; \$3.00 per 100; \$25.00 per 1000.

BOOK ON TRANSPLANTING

This book will be mailed free to each and every customer for 1928 free of charge. Sent immediately upon receipt of order.

Lucretia Dewberry

BLACK CAP RASPBERRIES

CULTURE

Raspberries will do well on any upland soil that will produce a good corn crop. Land should be thoroughly prepared and well enriched. Keep well cultivated and free from weeds. As soon as they are done bearing, cut out the old wood to give more vigor to the young canes. Plant in rows six feet apart and two and one-half feet apart in rows. Avoid wet lowlands.

WE GROW THE FINEST RASPBERRY PLANTS IN THE WORLD. OUR VARIETIES ARE THE KINDS THAT MAKE MONEY. THEY HAVE DONE IT FOR US. THEY WILL DO IT FOR YOU.

The Scarff Raspberries

THE SCARFF RASPBERRY

The Scarff Raspberry came from a seedling that came up by the side of a Gregg plantation of one of our nearby neighbors about ten years ago. It began to attract the attention of growers by its unusually good qualities.

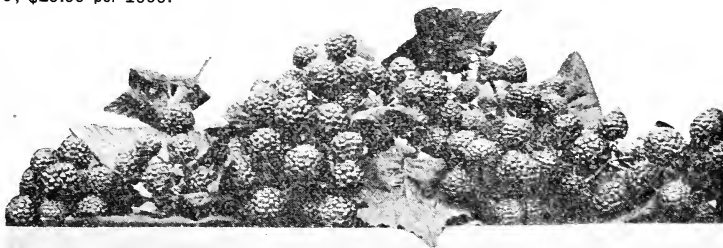

In size it compares with Cumberland, possibly a trifle larger. In productiveness it is far ahead of any black caps we grow. It is absolutely hardy. Canes practically are free from disease and strong, upright growers. The canes are cleaner by far than any Raspberry we have ever seen and we think it will stand heat and drought better. It makes an abundance of good strong canes, hence our low price, which should induce every grower to plant several acres. We have good strong plants to offer at the following prices: \$1.00 per dozen; \$4.00 per 100; \$30.00 per 1000.

GREGG

An old variety of merit too well known to need description. Price, 75c per dozen; \$3.00 per 100; \$25.00 per 1000.

KANSAS

A well known variety of merit. Fruit ripens early, is large, juicy and of good quality. Canes are strong growing, hardy and quite thorny. Price, 75c per dozen; \$3.00 per 100; \$25.00 per 1000.

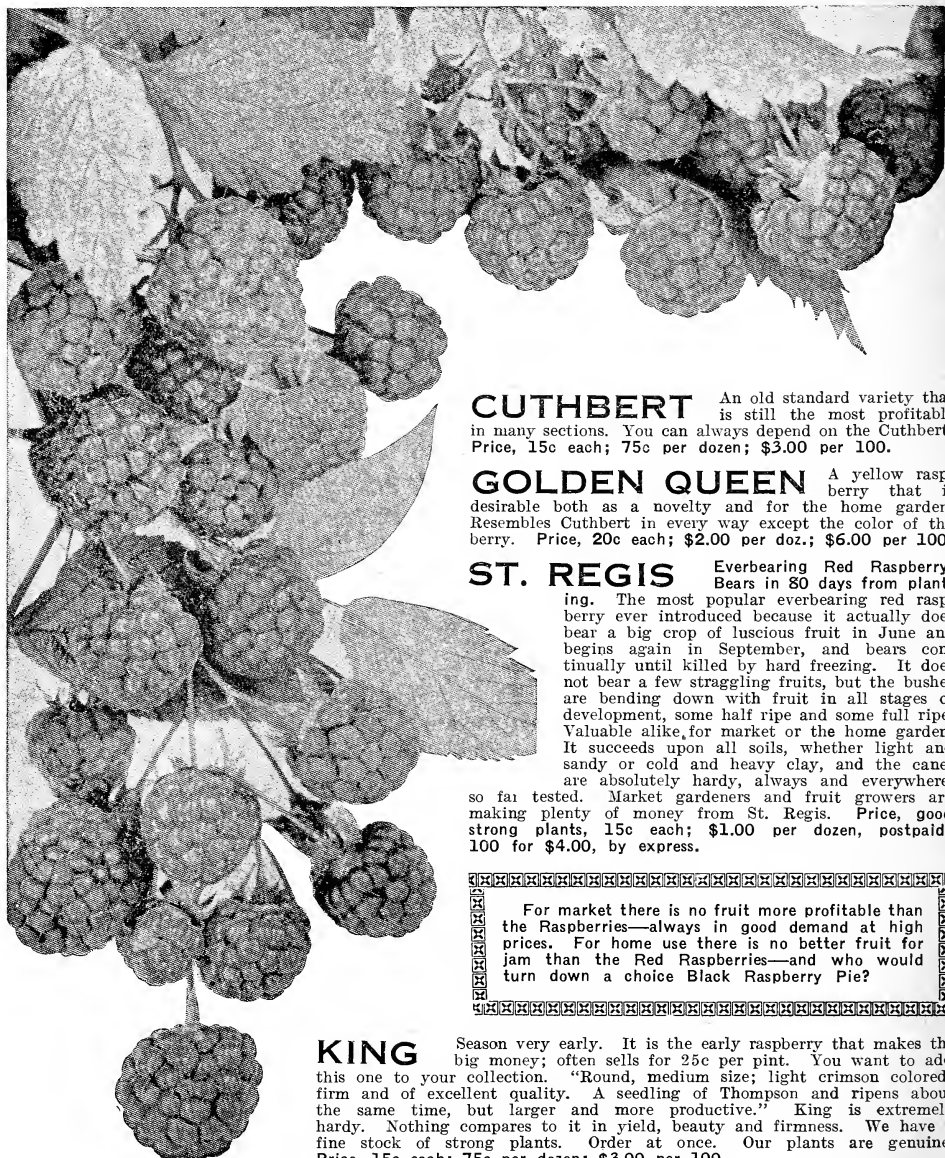

Cumberland Raspberries

CUMBERLAND

In hardiness and productiveness it is unexcelled by any other variety except possibly the "Scarff." In size, the fruit is simply enormous. The berries run seven-eighths and fifteen-sixteenths of an inch in diameter and are of handsome appearance. In spite of unusual size, the fruit is possessed of great firmness and is thus well adapted for standing long shipments. It follows Palmer and Souhegan and precedes Gregg a short time, making it a midseason variety. The bush is exceedingly healthy and vigorous, throwing up stout, stocky canes, well adapted for supporting their loads of large fruit. It has shown itself remarkably free from the scourge of its family, anthracnose. Large growers report yields of two and three times as much per acre as Ohio under same conditions, and far ahead of other varieties. Price, 75c per dozen; \$3.00 per 100; \$25.00 per 1000.

RED RASPBERRIES

VERY PROFITABLE SORTS FOR CITY MARKETS
AND MOST PRODUCTIVE

CUTHBERT An old standard variety that is still the most profitable in many sections. You can always depend on the Cuthbert. Price, 15c each; 75c per dozen; \$3.00 per 100.

GOLDEN QUEEN A yellow raspberry that is desirable both as a novelty and for the home garden. Resembles Cuthbert in every way except the color of the berry. Price, 20c each; \$2.00 per doz.; \$6.00 per 100.

ST. REGIS Everbearing Red Raspberry. Bears in 80 days from planting. The most popular everbearing red raspberry ever introduced because it actually does bear a big crop of luscious fruit in June and begins again in September, and bears continually until killed by hard freezing. It does not bear a few straggling fruits, but the bushes are bending down with fruit in all stages of development, some half ripe and some full ripe. Valuable alike for market or the home garden. It succeeds upon all soils, whether light and sandy or cold and heavy clay, and the canes are absolutely hardy, always and everywhere, so far tested. Market gardeners and fruit growers are making plenty of money from St. Regis. Price, good strong plants, 15c each; \$1.00 per dozen, postpaid; 100 for \$4.00, by express.

For market there is no fruit more profitable than the Raspberries—always in good demand at high prices. For home use there is no better fruit for jam than the Red Raspberries—and who would turn down a choice Black Raspberry Pie?

KING Season very early. It is the early raspberry that makes the big money; often sells for 25c per pint. You want to add this one to your collection. "Round, medium size; light crimson colored; firm and of excellent quality. A seedling of Thompson and ripens about the same time, but larger and more productive." King is extremely hardy. Nothing compares to it in yield, beauty and firmness. We have a fine stock of strong plants. Order at once. Our plants are genuine. Price, 15c each; 75c per dozen; \$3.00 per 100.

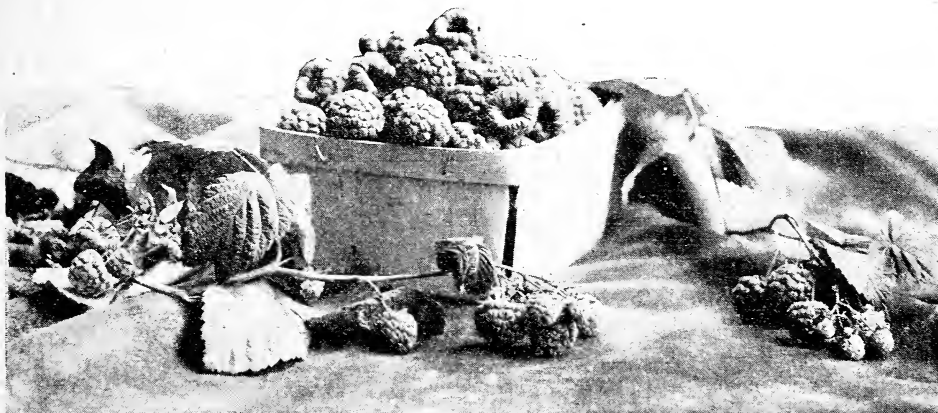

HERBERT Originated in Canada. It is a recognized fact that the farther north any fruit is grown, the better is its quality, and this "Child of the Northland" is no exception to this rule. The fruit is as large as the largest. It is as rich and highly flavored as the best, and by far exceeds any other kind in hardiness, rugged, thrifty constitution of plant, and is very productive. Price, 20c each; \$1.00 per dozen; \$5.00 per 100.

LATHAM

Yields Twice as Much as Other Red Raspberries

Here is a new red raspberry that was originated in Minnesota and acclaimed for its hardiness in that state. During the past few years its merits have spread with its planting throughout the middle and eastern states. It possesses the hardiness of "King" and produces very strong, vigorous canes; very productive. Berries are large, of highest quality, ripen evenly and hold up well throughout the season. The canes do not need covering even in severe locations.

Bulletin 407, Ohio Experiment Station gives the following description for Latham:—"Plants exceptionally hardy, vigorous, stocky, upright, very productive, strong plant producers; canes tall, reddish in color, strongly glaucous, foliage dark green; leaves relatively thick and leathery. Fruit large, broad, round, attractive, bright colored, firm, moderately sweet. Ripens in mid-season. Fruit is picked over a long season and frequently is found in the Fall on vigorous new shoots."

Latham Red Raspberries

Tests of the Extension Service of the Connecticut Agriculture College in 1924 and 1925 showed that Latham outyielded all varieties tested, producing almost twice as much as Herbert and Cuthbert, its closest competitors.

We have a fine stock of this splendid new variety and hope you will give it a thorough trial, as we are sure it will prove a money-maker for you, especially in a season when other standard varieties freeze out. Price, 20c each; \$1.50 per dozen; \$5.00 per 100.

Purple Raspberries

Grow Purple Raspberries for home use. They are unexcelled for canning, making pies, jams or for serving fresh or dessert.

COLUMBIAN The leading commercial variety of the purple type. Midseason, vigorous and productive. Berries dark, fairly firm; rich, sprightly flavor. Excellent for culinary purposes. Price, 20c each; \$1.25 per dozen; \$5.00 per 100.

THE NEW CARDINAL RASPBERRY This wonderful berry is a surprise in the fullness of its merits—its great growth, extreme hardiness and the exceeding productiveness of its choice purple, pure-flavored berries. It will pay. It is not a novelty, but a variety of great merit. The New Cardinal will grow ten feet, and bears in proportion. Leading horticulturists who have seen this berry say that it is one of the wonders of the century, so far exceeding all others as to put it entirely beyond comparison. Judge Wellhouse, President of the Kansas State Horticultural Society, said at the meeting of the Society that the introduction of the Cardinal Raspberry would add millions to the wealth of the farmers of the country because of its inherent great vigor and exceeding productiveness. Price, 20c each; \$1.25 per dozen; \$5.00 per 100.

HAYMAKER is a purple cap not as dark as Columbian or Shaffer, and much larger and firmer than either of those varieties, never crumbles, and stands up well in shipping. Sample crates have been shipped to distant points with entire satisfaction. It is a berry to grow for either home or market. The originator has found it the most profitable berry ever used for market, and has never yet been able to supply the local demand. So much of a favorite has the Haymaker become that local growers have said that it has ruined the sale of other varieties. Very popular as a canning berry. Price, 20c each; \$1.25 per dozen; \$5.00 per 100.

SCARFF'S CURRANTS

HAVE NO EQUAL FOR PROFIT & PRODUCTIVENESS

No garden is complete without them. Easy to grow and sure to bear. Our list comprises only the very best in cultivation. Plant 3 x 6 feet. Use Arsenate of Lead or Hellebore for worms.

Currants and Gooseberries can be planted as an Ornamental hedge row in the back yard or as a garden border. They will produce an abundance of beautiful fruit, excellent for culinary purposes, pies, jellies, etc.

As a commercial proposition for the city market or roadside market you will find the Currants a most profitable crop to grow and one that requires very little attention. Our Currants will make money for you.

Currants Planted in Young Orchard—On Scarff Farm.

Currants and Gooseberries are easy to grow and are excellent for planting in young Orchards as shown above. The culture necessary for the berries is just right for the trees.

CHERRY A popular well known variety largely planted for both market and home use. Plants vigorous, stocky, compact to spreading. Fruit bright red, large, juicy and fine flavor. Price, 20c each; \$2.00 per Doz.; \$15.00 per 100.

RED CROSS We have grown this variety for a number of years on our Fruit Farm and find it one of the most profitable currants that we grow. It was originated by the veteran horticulturist, Jacob Moore, who counted it one of his greatest achievements. In size it is equal to Fay or Cherry and will, we are sure, yield as much again as these old favorites. The quality is good and size of berries uniform. The red clusters are large, making it very easy to pick. Our pickers pick three crates a day of the Red Cross. It makes abundant wood growth, and it is not much bothered by borers. Price, 20c each; \$2.00 per doz.; \$15.00 per 100.

WILDER A remarkable variety; one of the strongest growers and most productive. Bunch and berry very large, bright, attractive red color, even when dead ripe; hangs on bushes in fine condition for handling as late as any known variety. Compared with the celebrated Fays, is equal in size, with much longer bunch, better quality with much less acidity; ripens at same time, continues on bush much longer; fully as prolific, in some trials largely outyielding it. Price, 20c each; \$2.00 per doz.; \$15.00 per 100.

FAY'S PROLIFIC Perhaps no other currant has received so much praise as the Fay. It is very large, and always sells well and at high prices. We consider it does better on heavy clay soil, well manured and thoroughly cultivated, than on lighter soils. Price, 20c each; \$2.00 per doz.; \$15.00 per 100.

PERFECTION Is a beautiful bright red. Size as large or larger than the Fay, the cluster averaging longer. The size of berry is well maintained to the end of the bunch. The Perfection has a long stem from point of attachment to the bush to the first berry, making it easy to pick without crushing any of the berries.

PRODUCTIVENESS. The Perfection is a great bearer, resembling its parent, the White Grape, in this respect; superior to the Fay or any large sort with which we are acquainted.

THE SEASON OF RIPENING is about the same as that of the Cherry or Fay.

QUALITY. Rich, mild, sub-acid, plenty of pulp with few seeds. Less acid and of better quality than any other large currant in cultivation. The White Grape has always been considered one of the best varieties for table use, and the effect of this strain is plainly seen in the very fine quality of Perfection.

VIGOR AND HEALTHFULNESS. In habit of growth it is intermediate between its parents. Fay and White Grape, with remarkably large, healthy foliage. Price, 25c each; \$2.50 per doz.; \$20.00 per 100.

LONDON MARKET The home of this valuable currant is Michigan, where hundreds of acres of currants are grown for the Chicago markets. No other variety is so popular in that noted fruit section. The fruit is of good size, being larger than Victoria, Versailles and North Star. The success of currant culture depends upon productiveness, size, and length of season the fruit will remain in prime condition on the bushes. London Market has all of these strong points and you are certain to make no mistake by planting heavily of this variety. Price, 20c each; \$2.00 per doz.; \$15.00 per 100.

NOTE—See quarantine regulations next page on Currants and Gooseberries.

SCARFF'S GOOSEBERRIES

OUR STOCK OF CURRANTS AND GOOSEBERRIES IS EXCEPTIONALLY FINE AND OUR VARIETIES ARE THE BEST, BEING HARDY, PROLIFIC BEARERS AND LARGE FRUIT. MAY BE PLANTED EITHER SPRING OR FALL.

We are just now beginning to realize the immense profits in Gooseberry culture. It is really amazing to learn of the great yields from a plantation that has been properly handled. A half bushel per bush is not an uncommon yield. The Rural New Yorker has published some remarkable records from plantations in New York and Indiana. We advise you to investigate this line of fruit growing and get started at once so you can reap the big profits in the early stage of the game.

CARRIE

(ALMOST THORNLESS)

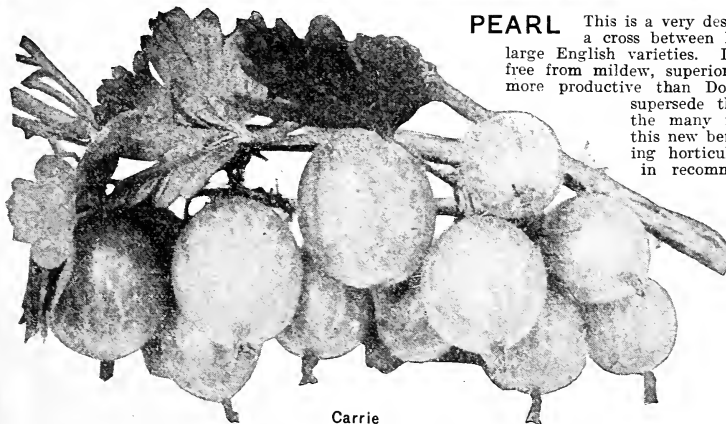

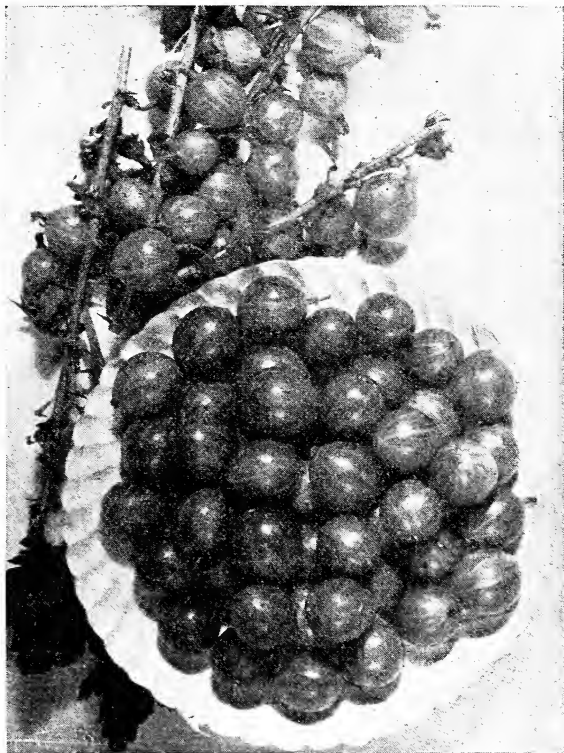

Carrie is one of the finest varieties of Gooseberries that is now in existence. Growers have found it of that thrifty robust nature that enables it to withstand considerable neglect, but at the same time responds quickly to extra care and attention. Originated in Minnesota. Vigorous and hardy, producing an abundance of leaves, free from mildew and anthracnose, nearly thornless. Fruit larger than Houghton, turning deep maroon when ripe; flavor excellent. Price, 30c each; \$3.00 per dozen.

JOSSELYN

General favorite among fruit growers. Large size, pink color when ripe, smooth, prolific and hardy. Carefully tested everywhere and one of the most profitable to grow for market. Free from mildew in both leaf and fruit. Foliage healthy, bright and clean. Bush strong, upright grower. Price, 30c each; \$3.00 per dozen.

QUARANTINE NOTICE

The States of Maine, Massachusetts New Hampshire, New York and Rhode Island have White Pine Blister Rust Control Areas and will not permit Currants or Gooseberries to be shipped into these States without a special permit. A modification of Federal regulations permits us to ship into any other States.

Carrie

PEARL This is a very desirable American variety—a cross between Houghton and one of the large English varieties. It is very hardy, entirely free from mildew, superior in size and quality and more productive than Downing, and is likely to supersede this standard sort. From the many flattering testimonials of this new berry from most of the leading horticulturists we have pleasure in recommending this variety for small or extensive planting as one of the best berries of recent introduction. Price, 30c each; \$3.00 per dozen.

HOUGHTON

Berries medium under ordinary care, but if thinned thoroughly in fall or spring fruit will be greatly improved. Color is pale red; tender and good; plants make a spreading growth of rather slender

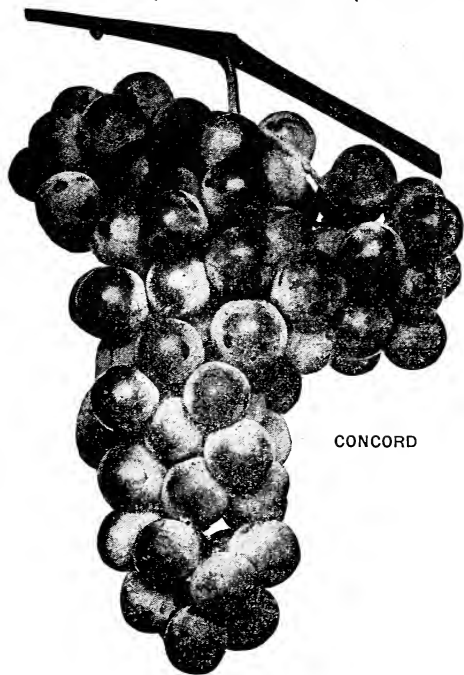

der wood; enormously productive. Price, strong plants, 30c each; \$3.00 per dozen.

DOWNING A large, handsome fruit, green in color; fine flavor; immense cropper and always in demand at fancy prices. American variety, free from mildew; bush strong grower; wood thick and strong. Price, strong plants, 30c each; \$3.00 per dozen.

GRAPES

Every home should have a dozen or more grape vines planted on an Arbor or along the garden fence. They are delicious to eat fresh from the vines; can be made into the most health producing grape juice; and jelly—Well who doesn't like grape jelly. Once planted the grape vines will continue to yield for years with practically no special attention. Our grapes are strong, well rooted plants that are sure to grow for you.

PRICE, ALL VARIETIES (EXCEPT CACO), 30c EACH; \$3.00 PER DOZEN.

CONCORD

Blue Varieties

CONCORD (Blue). An old variety; does well wherever planted; good size; productive.

MOORE'S EARLY (Blue). A large blue grape, ripening a week earlier than Concord; good grower; berries large, good quality, and makes a moderate yield; very valuable as an early grape.

WORDEN (Blue). A valuable blue grape ripening from three days to a week before Concord. Berry large, of good quality; thin skin; very productive; vine a strong grower. The most popular blue grape grown today. It comes in early enough to avoid the rush of Concord.

White Varieties

NIAGARA (White). The most popular white grape in existence. Fruit large and very productive; a good grower; ripening same season as Concord; equally good; valuable in every way.

MOORE'S DIAMOND (White). The color is a delicate greenish-white, with a rich yellow tinge when ripe. Very few seeds, juicy, and almost transparent. Berry size of Concord and two weeks earlier.

NIAGARA

Red Varieties

AGAWAM (Deep Red.). Deep red, large bunch, berries large, meaty with rich aromatic flavor. Ripens a little after Concord.

BRIGHTON (Red). One of the best grapes in cultivation. Bunch large and compact; a strong grower and very productive; quality good.

CACO (New Red Grape). A variety of exceptional merit and should be in every collection planted. It combines more good qualities than any other variety introduced in many years. The Caco is perfectly hardy in all parts of the country. It has been pronounced by the best growers in America to be equal in quality to any variety grown, either out of doors or under glass. It is the most beautiful of the hardy grapes, the bunches are large, well shouldered, color wine red with abundant bloom. Bunches are compact and of good size and form. Earlier than Concord and is sweet and palatable several weeks before it is fully ripe. The vine makes a very strong growth, hence is valuable for covering trellis or screens. Caco is beyond doubt one of the best of our native grapes. Price, 50c each; \$5.00 per dozen.

DELAWARE (Red). Standard of excellence in quality. Vine only moderately thrifty.

Novelty Fruit Collection

Different from ordinary fruits, and should be planted by everyone loving rare specimens. They are of but little value for commercial purposes. Plant in a small way only as Novelties and they will surprise and well repay you.

Strawberry-Raspberry Valuable for the extreme North, as the fruit is borne on the young growth, and is of course hardy in any climate. This is an entirely new fruit, both in habit of growth and form of fruit. Bushes grow 1 to 3 feet high, and are covered with red berries in the shape of strawberries. They are upright in manner of growing. Perfectly hardy, bound to become a valuable addition in the fruit line. It is very productive and a distinct novelty in small fruits. Price, 15c each; \$1.50 per dozen, postpaid.

Japanese Wineberry Ornamental both in fruit and plant. Canes covered with purplish red hairs. Fruits in large clusters and each berry at first tightly enveloped by the large calyx, forming a sort of burr, which is covered with purplish-red hairs. These gradually open and turn back, exposing beautiful wine-colored fruit of medium size, rich sub-acid, retaining flavor when cooked; highly esteemed for canning, preserves, jellies, etc. Price, 25c each; \$2.50 per dozen, postpaid.

Improved Dwarf Juneberry A good substitute for the large or swamp huckleberry, or whortleberry, which it resembles in appearance and quality. The fruit is borne in clusters, and is reddish-purple in color, changing to a bluish-black. In flavor it is mild, rich sub-acid; excellent as a dessert fruit or canned. The bushes are extremely hardy, enduring the cold of the far North and heat of summer without injury. When this fruit becomes better known to the public it will be very popular. It is much larger and better flavored than the Wild Juneberries. Price, 25c each; \$2.50 per dozen.

Strawberry-Raspberry

Himalaya Berry A new freak in horticulture which has caused a great furor among fruit growers. Extravagant claims were made for it by the introducer, but with us it is a failure. We have genuine plants from the introducer and if you want to try it we will be glad to furnish you the plants, but if you expect any great thing from the Himalaya, then we say go slow. Price, 20c each; \$2.00 per dozen, postpaid.

The Loganberry A hybrid between the Raspberry and the Blackberry. The fruit is as large as the largest Blackberry, and is produced in immense clusters. The color is a clear, dark red. It partakes of the flavor of both the Blackberry and the Raspberry—mild, pleasant, vinous flavor, delicious and peculiar to this berry alone. Seeds small, soft and few. Berries very firm, and carry well. Strong grower; enormous bearer. Fruit ripens early, just after strawberries. Not hardy north of 40th parallel without protection. Price, 50c each; \$5.00 per dozen, by mail, postpaid.

Crystal White Blackberry Strange as it may seem, this is a real creamy white Blackberry. Mixed with the jet black ones for dessert it makes a most wonderful dish. The fruit is about the size of Snyder, with few seeds and quite sweet when fully ripe. The bushes are good, strong growers and very productive. This is not a worthless novelty, but a fruit of real value, and should be in every garden. Price, 20c each; \$2.00 per dozen.

Topepo The New Vegetable. Both a Novelty and a vegetable of exceptional value. Obtained as a result of a cross between a Bell Pepper and a Stone Tomato. See inside cover page for more complete description. Price, 25 cents per packet; 5 packets, \$1.00.

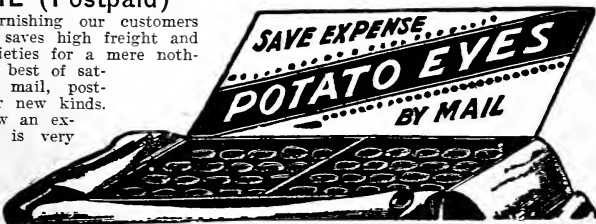

Japanese Wineberry

POTATO EYES BY MAIL (Postpaid)

For many years we have been furnishing our customers good, sound potato eyes by mail. It saves high freight and allows you to get a start of new varieties for a mere nothing. These potato eyes give the very best of satisfaction. Remember they come by mail, postpaid, and are sure to grow. Try our new kinds. At a very small expense you can grow an experimental patch for exhibition. It is very interesting and profitable. 75 eyes should produce a bushel or more of good, sound potatoes, any variety. Varieties we can supply. Six Weeks, Early Ohio, Irish Cobbler, Rural New Yorker, Seneca Beauty, and Petosky.

PRICES POTATO EYES (Postpaid): 12 eyes, 25c; 50 eyes, 50c; 125 eyes, \$1.00; 250 eyes, \$1.75; 500 eyes, \$3.50; 1,000 eyes, \$6.00.

WRITE FOR SPECIAL PRICES OF SEED POTATOES IN BUSHEL LOTS.

Dwarf Fruit Trees

SOLVE THE PROBLEM OF FRUIT GROWING IN SMALL GARDENS

For centuries the dwarf fruits have been grown in Japan, and for many years in Europe, but only in recent years have they attracted much attention in our own country. The trees do not attain the size of standard stock, therefore are better suited for suburban plantings, where space is limited; they can be planted closely, enabling the grower to have more of them and get quick results, as they begin bearing in 2 or 3 years if carefully planted and cared for.

DWARF APPLES

Dwarf Apples are grown by grafting on Paradise stocks.

Perhaps no other fruit is attracting so much attention at the present time as Dwarf Apples, especially for garden and yard planting. They can be planted 6 feet apart and do well. They begin to bear fruit the second or third year, and bear abundant crops. The fruit is just as large, same flavor, etc., as that borne on the standard trees. The great advantage is the early bearing of fruit. The trees never get over 6 or 8 feet high. Very profitable, bear 4 to 6 bushels per tree.

WE CAN SUPPLY THE FOLLOWING CHOICE DWARF KINDS: GOLDEN WINE-SAPS, YELLOW TRANSPARENT, JONATHAN, STAMENS WINE-SAP, WOLF, BLACK TWIG AND DUCHESS. TRY A DOZEN OR MORE TREES, AND GATHER FRUIT FROM THEM IN A VERY FEW YEARS. PRICE, 3-FOOT TREES, \$1.00 EACH; \$10.00 PER DOZEN.

**DWARF APPLE BEAR ABUNDANTLY
AT AN EARLY AGE**

DWARF PEARS

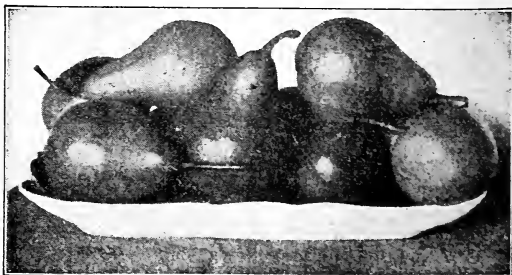

May be planted 6x6 feet, and they will begin bearing in a very few years. The Dwarf Pears are grown by budding on Quince stocks.

The following varieties are particularly recommended for cultivation.

All are vigorous and handsome growers, hardy and productive.

KOONCE
 KIEFER
 SECKEL
 WILDER
 BARTLETT
 CLAPP'S FAVORITE
 DUCHESS
 FLEMISH BEAUTY

Price of Dwarf Pear trees, three feet high, each, \$1.00; \$10.00 per doz.

APPLES

SUMMER AND FALL VARIETIES

TRANSPARENT Pale, lemon yellow, very good, the earliest apple to ripen and a fine market sort Starts to bear good crops of fruit very young.

DUCHESS OF OLDENBURG Red striped, underlaid with clear yellow. Quality very good and is a heavy producer.

WEALTHY One of the finest of the midsummer varieties. Red striped, tender, juicy and a reliable bearer.

MAIDEN BLUSH This is undoubtedly the most popular late summer variety grown. Like the Transparent the Maiden Blush produces good crops even when more or less neglected. For pies and baking purposes this variety is unexcelled.

JEFFERIS The Jefferis surpasses all summer varieties for quality, making it especially desirable for planting in the home orchard. Fruit yellow, striped with light red; ripens over a long season. The best for eating.

RAMBO WOLF RIVER SUMMER RAMBO

WINTER VARIETIES

BANANA A winter variety with decided banana flavor. Comes into bearing early. Fruit is large, perfect in form, golden yellow, beautifully shaded and marbled with bright crimson. Flesh lemon yellow, creamy texture and of the highest quality.

DELICIOUS A very popular variety. Fruit large and nearly covered with brilliant dark red. Flesh fine grained, crisp and melting with a delightful aroma; of very highest quality. A good keeper and shipper.

FAMUSE **SNOW APPLE.** Medium sized, roundish, almost entirely red. Flesh white, tender, juicy, sometimes tinted with pink. Good producer, early winter.

ENSEE The fruit is larger, better colored, juicier and is more widely adapted than its parent, the Rome Beauty. The trees bloom about the same time as Grimes Golden and both buds and bloom will stand frost much better than the average. In the Northern Apple sections the Ensee is much better adapted than the Rome Beauty as it does not scab so badly and colors earlier. It hangs to the tree well after colored and keeps well in storage, retaining its crisp, juicy texture, and does not become dry and mealy as does the Rome.

WINTER MAIDEN BLUSH A beautiful apple of waxen yellow color. Keeps well into the winter and is of high quality for cooking and eating. Tree is a strong grower, comes into bearing early and is a good producer.

McINTOSH RED Hardy Canadian apple. Good annual bearer. Fruit medium sized, nearly covered with dark red; flesh white, tender, juicy. Highest quality.

CANO One of the most reliable producers of all apple varieties. An improved Ben Davis that is higher in quality and better in color.

BALDWIN An old variety of well-known merit. Highly prized both for its cooking and dessert qualities.

OTHER WINTER VARIETIES

GRIMES GOLDEN, JONATHAN, WHITE PIPPIN, ROME BEAUTY, WINESAP, STAMENS, YORK IMPERIAL, STARK, NORTHERN SPY, N. W. GREENING.

Price Apple Trees—75c each; \$8.00 per dozen; \$60.00 per 100.

23,000 BU. APPLES — SCARFF'S FRUIT FARM

Although 1927 was considered a poor apple year generally our Orchards responded to the care given them and yielded 23,133 bushels of good clean apples. If you live within driving distance, we invite you to drive over to our Fruit Farm during the harvest season. Practically all of our Fruit is sold to Automobile trade at the Orchard.

CRAB APPLES

Varieties—Hyslop, Whitney, Transcendent. Price, 75c each; \$8 00 per dozen.

PEACHES

BIG RED (SHIPPERS LATE RED). Originated in Indiana where it is considered without doubt the best commercial peach on the market. Fruit is a perfect freestone, oblong, large to very large, averaging one-third or more above the best Elbertas; skin is a fine golden yellow almost completely covered with a splendid rich red making the well ripened fruit on the tree appear as if it were a solid red all over and texture of skin is such as to give the peach the highest shipping quality; flesh rich yellow, moderately fine grained (no fibre) juicy and of good quality; ripens about one week to ten days after Elberta; that is, it ripens in this section about the second week in September. In the orchard it makes a large spreading healthy tree—thus affording ample room for hanging the abundant crops it bears annually. Price, 75c each; \$7.50 per dozen.

STANDARD PEACHES

Prices, except where noted, 4 to 5 feet, good trees, 60c each; \$6.00 per doz.; \$45.00 per 100.

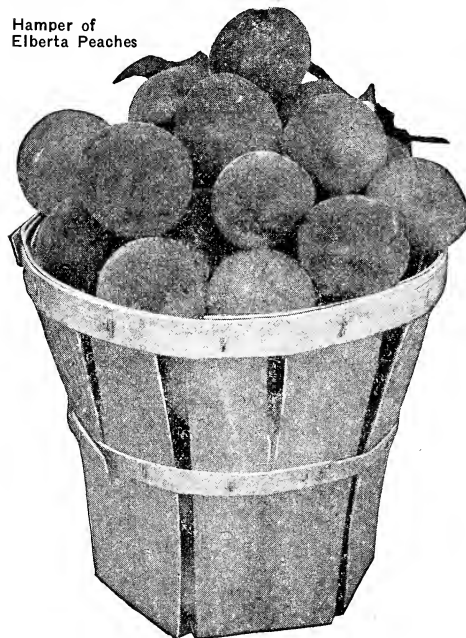

ELBERTA The standard commercial yellow variety of peaches. Heavy yielder and tree is a strong grower. Quality is good if allowed to ripen on tree. Freestone, midseason.

J. H. HALE Large size and beauty of the fruit are the two outstanding characteristics of the Hale. Fine for dessert or canning. Always brings fancy price on market. Fruit large yellow with red cheeks. Freestone.

SMOCK Ripens quite late. Considered among the best for canning. Yellow freestone, good size and fine flavor.

CHAMPION The finest white peach grown. Ripens before Elberta. Excellent for eating and canning. Tree very hardy and robust grower. Do not fail to include the Champion in your planting. Fruit is large size, creamy white with red cheek.

Hamper of
Elberta Peaches

CROSBY. Valuable especially for the unusual hardness of its fruit buds. Flesh bright yellow; red at the pit; juicy, rich. An abundant and regular bearer. Ripens before Crawford's Late.

CRAWFORD'S EARLY. One of the best early yellow peaches. Fruit large; yellow with a bluish cheek; very beautiful and productive. Last of July

MAYFLOWER PEACH

Practically frost-proof—it blooms very late thus quite safe from damage by ordinary frost. This new peach is the earliest peach in existence. It is perfectly hardy, an abundant cropper, and should be in every home collection of fruit. Mayflower is a cling peach. Price, good trees, 60c each; \$6.00 per dozen; mailing size, 50c each; \$5.00 per dozen.

APRICOT

HARRIS HARDY APRICOT. The fruit is fully as large as the best Apricot grown in California, and so much better in quality as to make and hold a place in the market against the very best from California. Price, \$1.25 each; \$12.00 per dozen.

NECTARINE. A very delicious, smooth skinned fruit, which thrives wherever peaches will grow. Price, \$1.00 each; \$10.00 per dozen.

PLUMS

Price, good trees, \$1.00 each; \$10.00 per dozen.

MOORE'S ARTIC. Very hardy; a prolific bearer; dark purple; flavor fine.

SHIPPER'S PRIDE. A large blue plum; very hardy and productive; esteemed for market.

REINE CLAUDE. Green Gage. Very large, greenish; fine flavor.

GERMAN PRUNE. A valuable plum of fair quality for dessert. Long oval purple with a thick blue bloom; flesh firm and pleasant, separating from the stone. September.

BRADSHAW. Very large fruit; dark red; flesh inclined to yellowish-green.

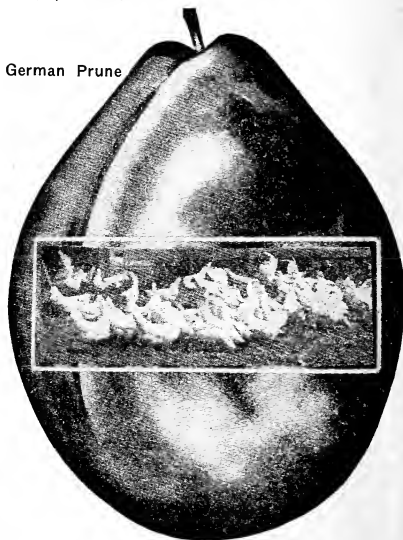

LOMBARD. Size medium; dark blue; sweet, good. A variety valuable for market. A great producer of fine blue plums. Most popular variety of blue plums grown.

RED JUNE. A vigorous, hardy, upright, spreading tree as productive as abundance, with fruit equally as large. Small pit, juicy, reliable bearer.

BURBANK. It is one of the most promising of any variety of Japanese origin. Vigorous, strong branches. A good shipper. June.

QUINCE **CHAMPION.** **MEECH'S PROLIFIC,** **ORANGE.** Strong trees of these varieties for \$1.00 each; \$10.00 per dozen.

German Prune

CHERRIES

A GOOD COMMERCIAL CHERRY ORCHARD PAYS BIG PROFITS

Price, fine trees, 5 to 6 feet, well-headed and good roots, \$1.00 each; \$10.00 per dozen.

Now is a most opportune time to plant a few cherry trees or a cherry orchard. The number of bearing cherry trees has been noticeably reduced during the past few years, due largely to cherry leaf spot which can be very readily controlled by several summer sprays of Lime-Sulphur 1-40. Do not delay planting your trees. Place your order with us at once and insure your supply of fresh fruit.

Winter Scene In One Of Our Cherry Orchards.

The above cherry orchard was interplanted with Currants and Gooseberries in 6 ft. rows and a row of Strawberries between each of these rows.

Small fruits are most valuable in any young orchard. The cultivation that is necessary for the berries is just what the young trees require.

GOV. WOOD

One of the best sweet cherries. Large, light red, juicy and delicious. Tree healthy and a good bearer. Early June.

YELLOW SPANISH

Very large, yellow and rich; a popular variety. Is of Spanish origin. Sweet.

BLACK TARTARIAN

Dark red; quality is excellent. The tree is a thrifty grower and is one of the most desirable sweet varieties to plant.

EARLY RICHMOND

Dark red; medium size; very popular. A standard and time-tried variety. Early May market.

MONTMORENCY

Larger than Early Richmond, about ten days later, and is probably the best and most paying variety in cultivation for market.

Best for canning.

No better time than now to plant Cherry Trees, as the demand was never better for good fruit.

STANDARD PEARS

Price, fine trees, \$1.00 each; \$10.00 per dozen.

SECKEL

Small, skin rich yellowish brown when fully ripe, with deep brownish-red cheek; flesh very fine grained, sweet, exceedingly juicy, melting in the mouth.

DUCHESS

Very large, buttery, rich, juicy, excellent. It succeeds to perfection and is the most popular market variety as a dwarf.

KIEFFER

A sport of the Sand Pear and Bartlett; a very ornamental variety, owing to its beautiful foliage. Bears very young, often fruiting in the nursery row. Fruit never rots at core. September and October.

WILDER EARLY

The claims of this pear are early ripening, productiveness, high quality and healthy growth; also long keeping qualities.

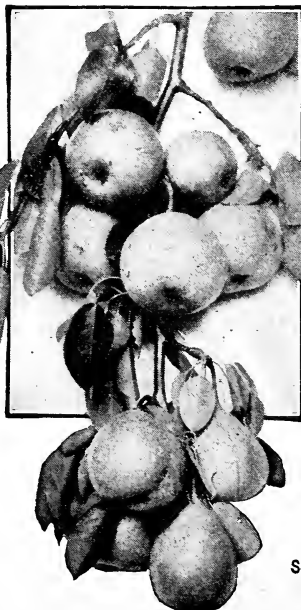

BARTLETT

Size large, with blush next the sun; quite juicy; excellent flavor; fruits when quite young. One of the most popular. July and August.

WE CAN FURNISH OTHER STANDARD VARIETIES OF PEARS AT THE ABOVE PRICES.

QUINCE

CHAMPION. MEECH'S PROLIFIC, ORANGE. Strong trees of these varieties for \$1.00 each; \$10.00 per dozen.

Seckel

Ornamental Shrubs

For Beautifying the Home

Nothing will add more to the value and beauty of your home than a few of our beautiful flowering shrubs planted around the house and in the lawn. We are recommending only the ironclad shrubs which are perfectly hardy, the varieties which have proven their worth and bloom profusely under a wide range of conditions.

ALTHEA ROSE OF SHARON. Strong, erect-growing shrub of easiest culture, perfectly hardy and a prolific bloomer. Large, showy flowers in late summer when few other shrubs are in bloom. Assorted colors. Price, 30c each; \$3.00 per dozen.

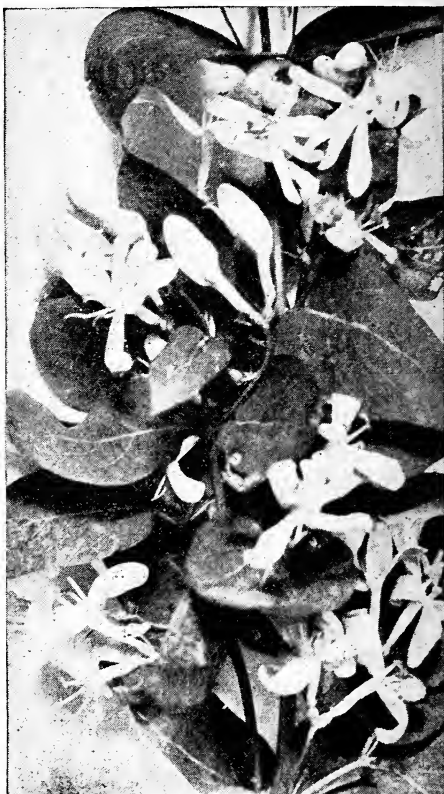

BARBERRY JAPANESE BARBERRY (*Berberis Thunbergii*). A most beautiful dwarf Barberry from Japan. Changing in autumn to beautiful tones of orange, scarlet, and crimson. Yellow flowers produced in early April, followed by red berries which are produced in great profusion and which last the entire winter. It fits in anywhere and everywhere and always looks fine, and at the foundation of the house or porch, along the side of walks, in front of any tall-growing shrubbery, or as an individual plant on the lawn it is always in keeping with its surroundings. It is of low, dense, horizontal growth, graceful in all its branches. Absolutely hardy wherever planted. Price, large plants, 35c each; \$3.00 per doz. Hedge size, \$15.00 per 100.

BUSH HONEYSUCKLE The Bush Honeysuckles are especially desirable because they come out in leaf very early in the spring and produce very excellent foliage effect throughout the year, producing numerous flowers in May and followed by very attractive red and orange fruits. We can furnish the white and pink flowering Tartarian Honeysuckle. Price, 35c each; \$3.50 per dozen.

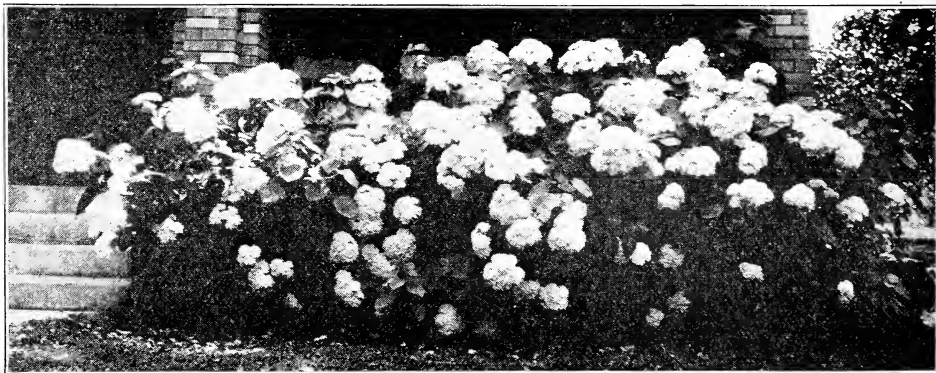

DEUTZIA PRIDE OF ROCHESTER. Shrub attaining a height of 4 to 6 feet, producing large clusters of white bloom in early June. The foliage effect is good and it is a strong grower. Price, 35c each; \$3.50 per dozen.

DOGWOOD RED TWIG DOGWOOD. A very hardy, thrifty shrub, doubly attractive because of its creamy white flowers in early summer followed by clusters of white berries, and its very conspicuous blood red branches throughout the winter. Price, 35c each; \$3.50 per dozen.

EUONYMUS (*Evergreen*). This is a thrifty-growing little plant valuable as a ground cover or to plant in front of other shrubbery or used alone where a low planting is desired. This *Euonymus* retains its leaves throughout the winter and may be kept trimmed down to any height. Has a tendency to vine and is excellent as a wall cover on chimneys, lattice work, etc. Price 30c each; \$3.00 per dozen.

Bush Honeysuckle—Flowers White or Pink

Hydrangea Arborescens (Hills of Snow)

HYDRANGEA ARBORESCENS

(Hills of Snow). This new American Everblooming Hydrangea is believed to be the most beautiful hardy flowering shrub introduced during the past twenty years. The plant which attains a height of five or six feet, with near the same breadth, is by far more graceful in habit than the old form, with large trusses of beautifully formed flowers of dazzling whiteness, rendering this a plant of peerless beauty. It seems to thrive in various soils, and when fully exposed to the sun as well as in partial shade. The profusion of bloom of this new Hydrangea is very unusual. There have been counted 100 good trusses on one plant—trusses 7½ inches in diameter. Price, 35c each; \$4.00 per dozen.

SNOWBERRIES

SNOWBERRY This is one of our most valuable shrubs for its winter fruit. The large white berries are produced in clusters in late summer and hang on nearly the entire winter. The low-growing habit makes it valuable for foundation planting, especially on north exposures and in shady locations. Price, 35c each; \$3.50 per dozen.

BUTTERFLY BUSH Beautiful large lilac color, spikes of flowers from mid-summer till early Fall. One of the most desirable for cut flowers. Attractive to butterflies when in bloom. Be sure to plant a few of these in with your other shrubbery. Price, 30c each; \$3.00 per dozen.

GOLDEN BELL **FORSYTHIA SUSPENS.** You have noticed these graceful sprays of golden yellow flowers—about the first to bloom in the spring—that push themselves into the sunlight long before the leaf buds have burst. Branches have a tendency to droop, making a beautiful specimen shrub, or may be planted in a group with other shrubbery. Price, 35c each; \$4.00 per dozen.

GOLDEN PHILADELPHUS Leaves bright golden color. Excellent for contrast with other shrubbery. Low growing, free bloomer. Price, 50c each; \$5.00 per dozen.

INDIAN CURRANT Similar to the Snowberry, except that its fruits are red, and that the smaller red berries cluster in thick ropes along the weighed-down stems. Price, 35c each; \$3.50 per dozen.

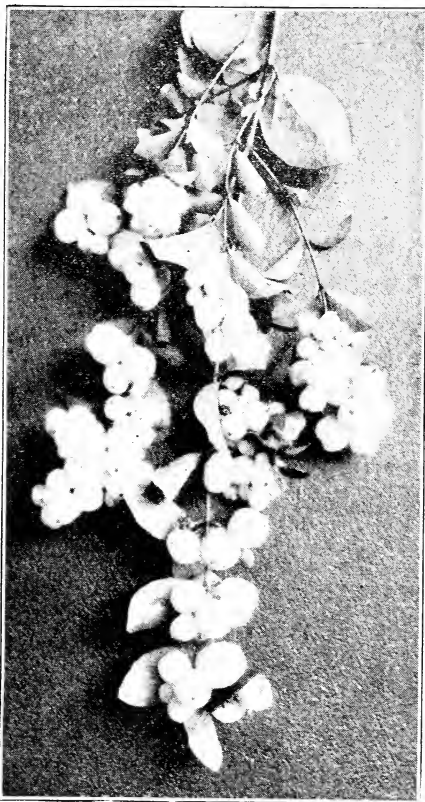

PHILADELPHUS—SYRINGA Mock Orange. In the spring this shrub is practically covered with masses of large, very fragrant, creamy white flowers. It is an old garden favorite. Price, 35c each; \$3.50 per dozen.

PUSSY WILLOWS Our new French Pussy Willows are a delight to all who see them. These large silvery flowers open up in late winter. They come as a Herald of Springtime. Plant them as a screen or hedge in the background, or plant as a tall shrub in your lawn. Their growth is compact and graceful. Price, 40c each; \$3.00 per dozen.

SNOW BALL An old shrub of great merit. The beautiful large white clusters of bloom are excellent for cut flowers. The plant is a good strong grower, attaining a height of 6 to 8 feet. Price, 35c each; \$3.50 per dozen.

HYDRANGEA PANICULATA GRANDIFLORA

Has been very popular for thirty years or more, and millions of plants have been delivered to pleased customers the world over, and sales were never larger than at the present time. Price, strong plants, 35c each; \$4.00 per doz.

Snowberries

Hydrangea Paniculata Grandiflora

Spirea Van Houttei

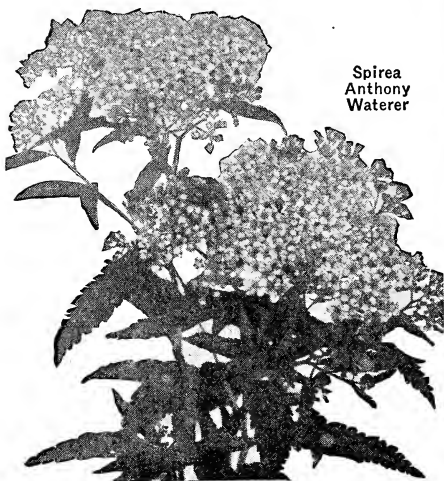

Plant at least a half dozen of these beautiful white flowering shrubs about the lawn, and they will repay you a hundred fold.

In making a house and lawn attractive there is no better shrub than the Spirea Van Houttei. It is a plant growing about five feet high, with delicate leaves and clusters of white flowers. This shrub can be used in groups or in hedges with very good effect. The Spirea Van Houttei is one of the very best hardy plants for an ornamental hedge, or for artistic groupings, and it will bear clipping into compact form, as well as any shrub. Price, for large plants, 30c each; \$3.50 per dozen; \$25.00 per 100.

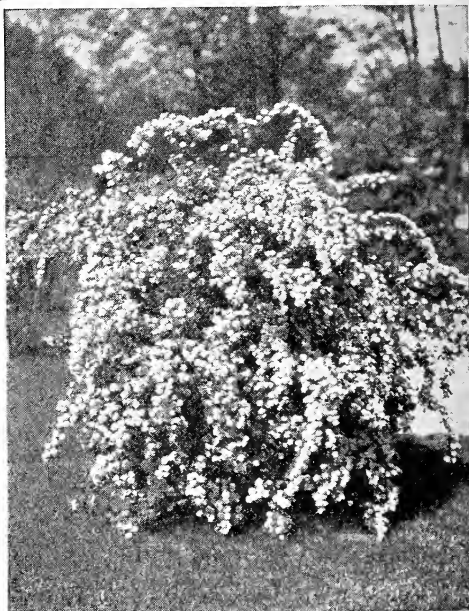

SPIREA THUNBERGI

(SNOW GARLAND)

A very graceful low growing shrub, excellent for foundation and border plantings. Attains a height of 3 feet and produces a profusion of miniature white flowers very early in the spring, often while the snow is still on the ground. Price, 45c each; \$3.50 per doz.

Spirea
Anthony
Waterer

Spirea Van Houttei

SPIREA ANTHONY WATERER

Produces a red bloom about mid-summer and continuing to bloom for several weeks. It is extensively used in foundation plantings as it only attains a height of about 3 feet. Foliage buds out in very bright green early in the spring and may be kept trimmed down to almost any height. Valuable also for low hedge planting. Price, 40c each; \$4.00 per dozen.

SPIREA BILLARDI
(Red and White)

This is a beautiful upright growing Spirea reaching a height of 5—6 ft. that is good to plant back of the Anthony Waterer or Thunbergi. Price, 35c each; \$3.50 per dozen.

SPIREA FROBELLA

Similar to the Anthony Waterer, stronger growth. Flowers pink, blooming over long period. Price, 35c each; \$3.50 per dozen.

SPIREA COLLECTION POST PAID FOR \$2.00

New Red-Leaved Japanese Barberry

It is only once in a lifetime that a really worthwhile, outstanding novelty in hardy shrubs is introduced, and in this new Barberry we have such a plant.

It is similar in all respects to the green-leaved Japanese Barberry which is so popular for mixing in the shrubbery border, as single specimens, or for planting in clump on the lawn, as well as for foundation plantings and for hedges, but the foliage of this new variety is of a rich, lustrous, bronzy red, similar to the richest red-leaved Japanese Maples. However, unlike these and other colored shrubs in which the coloring fades or disappears entirely as the season advances, this new Barberry becomes more brilliant and gorgeous throughout the summer, and in the fall its foliage changes to vivid scarlet, and red shades, more brilliant and more effective than in the ordinary Japanese Barberry. In this coloring it is unequalled by any other shrub and is followed by the same brilliant scarlet berries common to the type, which remain on the plant the entire winter.

All that is required to develop its brilliant coloring at all seasons is that it be planted in full exposure of the sun.

Price, strong plants, 50c each; \$6.00 per dozen; \$50.00 per 100.

New Red Leaved Japanese Barberry

WEIGELIA ROSEA

This shrub has long been popular for ornamental planting. Produces a profusion of trumpet shape flowers of beautiful deep pink color in early June. A thrifty grower and one that you will not want to omit from your planting. Price, 35c each; \$3.50 per dozen.

Weigelia Rosea

TAMARIX AFRICAN TAMARIX. A beautiful, tall, loose-growing shrub with fine feathery foliage and producing an abundance of small purple flowers in May. Strong, thrifty grower, especially valuable where used to cover a bare wall-space of a building or when planted back of other lower growing shrubbery. Price, 35c each; \$3.00 per doz.

YUCCA A hardy evergreen plant with long, narrow leaves that are bright green the whole year. The flowers are creamy white, bell-shaped, produced on long spikes 3 to 4 feet high. Fine stately lawn plant. Good strong plants, 25c each; \$2.50 per dozen.

ORNAMENTAL GRASSES Beautiful for lawn and borders. Two leading varieties: Eulalia Japonica and Zebrina Variegata. Good strong clumps, 35c each.

RIBBON GRASS. Good strong clumps, 25c each; \$2.00 per dozen.

PURPLE LILAC An old-fashioned shrub which will never lose its popularity. Price, 35c each; \$3.00 per dozen.

Scarff's Beautiful Privet Hedge Plants

The Privet is the most desirable hedge plant for the boundary of the lawn, along drives or to form an enclosure of any kind. The deep green glossy foliage hangs late in the fall and often well into the winter. The hedge adds a touch of privacy and formality to your home. The Privets are thrifty growers and will make a good thick hedge the first year after planting. They can be clipped to any shape.

California Privet Hedge

CALIFORNIA PRIVET HEDGE One of the most beautiful plants for hedges in existence. There is no other hedge plant that will equal the California Privet for the purpose, becoming more beautiful each year. A quick, strong growing shrub, yet easy to control by use of shears or knife to any desired shape. Fine for hedges between the city lots, on large rural grounds, parks, cemeteries, in single clumps with other shrubs, also as screens to out-buildings, fences, etc. Very easy to grow on all soils, even in partial shade; almost evergreen, its rich, leathery, green foliage turns to purple in winter. Price, \$1.50 per dozen, by mail, postpaid. Heavy plants, by express, \$6.00 per 100; \$50.00 per 1000. Medium grade, \$4.00 per 100; \$30 per 1000.

AMOR RIVER PRIVET This variety makes as beautiful a hedge as the California Privet and it has never winter-killed for us. Produces an oblong, glossy green foliage, half evergreen. Drops its leaves in early mid-winter. If allowed to grow untrimmed it produces beautiful clusters of white flowers followed by glossy black berries. Price, \$2.00 per dozen; \$8.00 per 100.

IBOTA PRIVET This perfectly hardy privet is popular on account of its spreading habit. It is one of the strongest growers of the privet family. Retains its leaves longer than the Amoor. Price, \$2.00 per dozen; \$8.00 per 100.

IBOLIUM PRIVET (NEW). A cross between California Privet and Ibota, having the attractiveness of California and at the same time is much hardier. Forms an excellent hedge when trimmed. Price, \$2.00 per dozen; \$8.00 per 100.

SCARFF'S REGALS PRIVET
SPECIAL STRAIN HARDY EVERYWHERE

The Regal's Privet is hardy everywhere, and is one of the most attractive of the Privet family. The branches are graceful and run out horizontal from the main stem, leaves flat and drooping. A strong grower and especially fitted for division fence between lots or for front fence. A distinct and attractive type that is highly satisfactory. Price, 20c each; \$2.00 per dozen; \$10.00 per 100; \$80.00 per 1000.

CATALOG OF LANDSCAPE GARDENING

We have issued a very fine catalog on landscape gardening and what to plant. It is well written and finely illustrated, and will be of great value to the planter and owners on fine estates. Sent free to persons interested in ornamental planting. We also give free to each customer a book on transplanting and care of trees, shrubs, etc. It is a valuable treatise.

Japanese Barberry

The Barberry excels as an informal hedge plant. Its low dense horizontal growth and graceful branching habit are well shown in the illustration below. When clipped the Barberry is fully as beautiful as the privets. Its outstanding good points are: A bright green foliage very early in the spring and this changing to beautiful shades of orange and red in the Fall of the year; and the attractive red berries which hang on all Winter and are sometimes retained until the plants leaf out the following Spring.

The Barberry produces a heavy root system and is very easy to grow. It forms a most beautiful and conspicuous low growing hedge, and one that is especially suited for making boundary lines. Equally as desirable for foundation planting as in a hedge. Price, hedge size, \$15.00 per 100. Large plants, 35c each; \$3.00 per dozen.

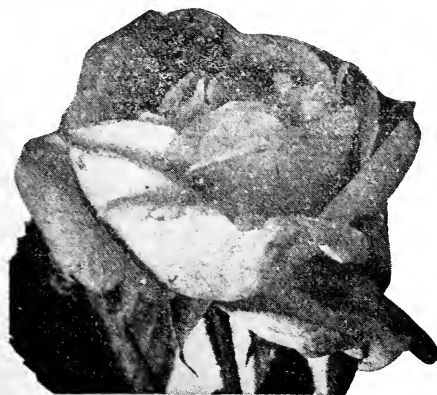

Japan Barberry (Thunbergii). Set Plants 1 Ft. Apart For Hedge.

ROSES

MOST BEAUTIFUL OF ALL FLOWERS

You can add beauty to the home with roses. Plant them on the porch trellis, plant them on the arch over the garden gate, on the fences and on the sides of the buildings. Our plants are all field-grown, blooming sizes.

HARDY GARDEN ROSES

50c each—\$6.00 per dozen.

These are the hardy varieties that have proven to be the thriftiest growers and most reliable bloomers. The flowers are lovely and should be in every garden or flower planting.

FRAU KARL DRUSCHKI—WHITE
GEN. JACQUEMINOT—RED
PAUL NEYRON—PINK
BABY RAMBLERS—PINK

ROSE HUGONIS. Pale clear yellow. Takes first place among the single flowered yellow roses and makes an excellent shrub for general use. Price, each, 50c.

Scarff's Superb Iris

The Iris is one of the easiest to grow of all the floral family. They will thrive year after year with perfect abandon and neglect. At the same time they respond quickly to good soil and clean culture. Give them plenty of water during the blooming period, after that little or no water, except the natural rainfall is needed. They are perfectly hardy anywhere and can be planted at almost any season of the year. Spring and fall, however, is the best season for planting. They bloom during May and June.

FLORENTINE One of the earliest. Plant exceptionally thrifty and prolific in bloom. Leaves remain green most of the winter. Excellent for border plantings. Flowers large, rich violet-purple. Price, 20c each; \$2.00 per dozen.

CELESTE One of the finest varieties. Beautiful fragrant flowers, self-colored pale sky blue. Very profuse bloomer, tall habit. Price, 25c each; \$2.50 per dozen.

PALE YELLOW Dark tan color. Strong grower, profuse bloomer. Price, 20c each; \$2.00 per dozen.

SIBERIAN IRIS (BLUE KING). Deepest blue. The most elegant and delicate of the Iris family. The foliage is narrow sword shape, beautiful green color. The flowers are clear deep blue and bloom in great profusion. A border of this variety or even a single clump commands the admiration and attention of everyone. Price, 20c each; \$2.00 per dozen.

GRACCHUS Late, medium height. Stands yellow with falls of a light wine. Price, 20c each; \$2.00 per dozen.

SNOW QUEEN (SIBERIAN). Beautiful large ivory white flowers, yellow stamens conspicuous in throat of bloom. Price, 25c each; \$2.00 per dozen.

OSSIAN Canary yellow or straw color with light violet falls. Late blooming, medium height, strong, thrifty grower. Price, 25c each; \$2.50 per dozen.

SANS SOUCI—HONORABILIS An exceptionally fine variety. Medium tall, thrifty grower. late. Stands are a clear orange yellow, falls are a deep wine. Very beautiful and highly prized. Price, 25c each; \$2.50 per dozen.

Mallow

NEW GIANT FLOWERING MARVEL MALLOW

The large, shown flowers of this new mallow average 5 to 6 inches in diameter. They start blooming the latter part of July, when flowers are quite scarce, and continue for over a month. This is a perennial that is perfectly hardy and thrives in either wet or dry soils. We are sure you will like it. We can furnish this in three colors, white, pink, and red. Price, strong roots, 25c each; \$2.00 per dozen.

PEONY

QUEEN OF PERENNIALS

Festiva Maxima Very Large, globular rose type. One of the largest white varieties, center flecked with crimson. Queen of all the peonies. Very tall, strong grower. Fine for cut flowers. Undoubtedly the most popular white in existence. Price, 50c each; \$5.00 per doz.

Fragrans Dark pink, medium size, compact and tall; fragrant, strong, vigorous grower. Price, 50c each; \$5.00 per dozen.

Madame Boquet Large, loose semi-rose type. Very dark crimson amaranth. Coloring very rich. Plant medium height, free bloomer. Very attractive. Midseason. Price, 75c each; \$8.00 per dozen.

Dupont Ivory white, center splashed with carmine. Very fragrant; tall and free bloomer. Price, 50c each; \$5.00 per dozen.

Madame Calot Flesh White tinted, fragrant; tall, strong grower, free bloomer. Early. Price, 50c each; \$5.00 per dozen.

Mons. Jules Eli A most beautiful peony. Very large bloom with high crown. Color is a delicate shade of rose pink. Quite fragrant. Medium in height and a very strong grower. One of the finest of all peonies. Price, 75c each; \$7.50 per dozen.

SPECIAL PEONY OFFER

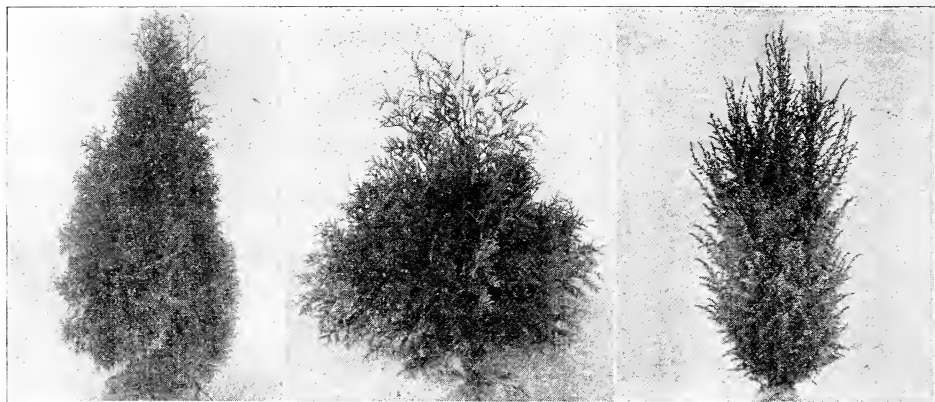

One each of above varieties—Value \$3.50
 6 Peonies \$2.50, Postpaid.

Gladiolas

EVERGREENS

These are the plants that will give your planting a striking green effect throughout the winter. The varieties we are offering are the hardy types that are good compact plants and are easy to transplant. Plant them in front of your porches, in foundation or group plantings. They will double the beauty of your planting.

Pyramid Arbor Vitae

American Arbor Vitae

Irish Juniper

PYRAMID ARBOR VITAE

A densely branched variety forming a perfect column; holds its shape without trimming or pruning. Price, 3 ft. plants, \$2.00 each.

AMERICAN ARBOR VITAE

Strong, graceful habit of growth. Can be kept trimmed to any desired shape. Useful for screens and high hedges, also for large group plantings. Price, 2 to 3 ft. plants, \$1.50 each.

IRISH JUNIPER

A very beautiful columnar form of Evergreen with upright branches. Foliage effect is silvery green. Excellent to use for accent planting; to place on either side of entrance; to plant as background for lower types. Our stock of these is very fine. Price, 2 ft. plants, \$1.50 each.

NORWAY SPRUCE

Branches horizontal; excellent for wind breaks. The smaller sizes are used for foundation planting and kept down to desired size by trimming. Price, 2 to 3 ft. plants, \$1.25 each.

RETINOSPORA PLUMOSA

Graceful plumelike foliage, compact and an excellent Evergreen for either foundation or planting in group with other evergreens. Our field of these is very fine and we can furnish you good thrifty plants. Price, bushy plants, 2 ft. in height for \$1.75 each.

CHINESE ARBOR VITAE

(BIOTA). When young it is very compact and rather pyramidal in growth and as it becomes older assumes the habit of a rather loose growing cedar. Foliage is bright green turning to bronze in winter. Price, 24 in. trees, \$1.25 each.

GOLDEN ARBOR VITAE

(GEO. PEABODY). Similar to American Arbor Vitae except tips of branches are beautiful golden color in sharp contrast to the deep green of other varieties. Price, 18 in. plants, \$1.50 each.

Norway Spruce

Retinospora Plumosa

Chinese Arbor Vitae

WINDBREAKS

FOR THE RURAL HOME AND SURROUNDING FEED LOTS

Our homes are located in a natural grove of trees and it is remarkable how in the dead of winter when the trees are practically devoid of leaves, the force of the bitter cold wind is broken. Our houses and our barns are warmer and it is more pleasant to be out of doors here than around some of our neighbors' buildings where the wind has a clear sweep. Many of our fence rows are planted to trees, which serve the triple purpose of checking the bleak winds of winter, the hot drying winds in the summer, and they add greatly to the beauty of the landscape.

You may secure this protection with very little expense by planting Norway Spruce (Evergreen) or quick-growing deciduous trees around your buildings and along your fence rows, especially on the north and west exposures.

A good protection of Evergreen Trees around live stock can not be over emphasized. It will not only provide comfort but will keep them in a healthier condition and will enable them to put on more weight or produce more milk with the same amount of food consumption.

A Valuable Wind Break of Norway Spruce.

NORWAY SPRUCE

Beyond doubt the Norway Spruce is the best Evergreen for the windbreak; as it is a comparatively rapid grower, hardy, easy to transplant, and it's branches extending to the ground, are compact enough to completely check the force of the wind. We can furnish the Norway Spruce in strong 2 ft. trees, suitable for windbreak planting at 75c each; \$7.00 per dozen; \$60.00 per 100.

NORWAY POPLAR

Is one of the fastest growing of the deciduous trees and is quite often used where a windbreak is desired in the minimum of time. Since it is a much more rapid grower than any of the Evergreens it is valuable as temporary protection until the Norway Spruce have attained a good height. Price, strong 8 ft. trees, 75c each; \$6.00 per dozen; \$50.00 per 100.

Other Valuable Evergreens for Home Beautification

YUCCA Vivid green sword shaped foliage as shown in illustration. Remains green all winter. Produces tall spikes of beautiful bell shaped flowers in August. Price, 25c each; \$2.50 per dozen.

EUONYMUS RADICANS Holds its leaves until very late winter; valuable to plant in front of other shrubbery as edging; forms excellent low growing hedge if kept trimmed; can be trained to wall or chimney as a vine. Price, 30c each; \$3.00 per dozen.

DWARF BOXWOOD A hardy low growing type of Boxwood used extensively as edging and for low hedges. Price, 10-12 in. plants, 35c each; \$3.50 per dozen.

MAHONIA

Holly Leaf Mahonia. Low growing Evergreen to 3 ft. Yellow bloom in early spring followed by glossy black berries. Leaves just like Holly. Price, heavy plants, 12-15 in., 75c each.

Yucca

Euonymus Radicans

HARDY ORNAMENTAL CLIMBING VINES

Boston Ivy The most desirable Ivy for chimneys, brick and stone walls. Leaves are glossy green, clings tight to any surface and forms an even carpet of green. Price, 50c each; 5 for \$2.00.

Virginia Creeper Five-leaved Ivy. One of the best for wooden surfaces, to cover fences, posts, etc. Strong grower, hardy and a good climber. Price, 25c each; \$2.00 per dozen.

Chinese Matrimony Vine Strong growing woody vine producing small purple flowers in midsummer and numerous orange-red fruits in the fall. Price, 25c each; \$2.50 per doz.

Clematis Paniculata (Virgin's Bower). The finest of the small-flowered Clematis. In midsummer the entire vine is clothed in a mass of white bloom, followed by numerous light feathery seeds which are attractive until late in the winter. The vine is thrifty, hardy and a strong grower, and is very beautiful when grown intermingled with Honeysuckle. Price, 35c each; \$3.50 per dozen.

Clematis (Large-Flowering). We can furnish these in assorted varieties. Price, 50c each.

Climbing Euonymus (Evergreen). A hardy evergreen vine, very strong grower and perfectly hardy. Produces small white flowers. The vine requires a little supporting on hard, smooth surfaces. Very desirable to use on chimneys, walls, lattice or wherever an evergreen vine is desired. Often used in window boxes and porch boxes to furnish color during the winter months. When kept trimmed it forms a compact, low, bushy shrub, very attractive around the porch or foundation. Strong plants, 35c each; \$3.00 per dozen.

Honeysuckle (Sweet Scented.) A well-known almost evergreen vine, highly desirable for its beautiful glossy green foliage and for its fragrant flowers which are produced over a long period during the summer and are followed by jet black fruit which remains on the vine most of the winter. Plant them along the garden fence, along the side of the lawn or on the porch lattice. You will be delighted with their fragrance. Price, 25c each; \$2.50 per dozen.

Trumpet Honeysuckle (Red). This is a very beautiful variety that retains its glossy green foliage practically all winter. Flowers are orange red, trumpet shaped, borne in clusters and holding on over quite a long period of the summer. Price, 35c each; \$3.50 per dozen.

Trumpet Flower From the old garden. Flowers perfect, trumped-shaped, bright scarlet. A rapid grower, one of the finest vines for covering old stumps, fences, trellises, etc. Blooms almost continuously through the summer. Price, 25c each; \$2.50 per dozen, postpaid.

Purple Wistaria 50c each; \$2.50 per dozen.

Chinese White Wistaria Silvery white. Same price as Purple Wistaria.

Clematis Paniculata

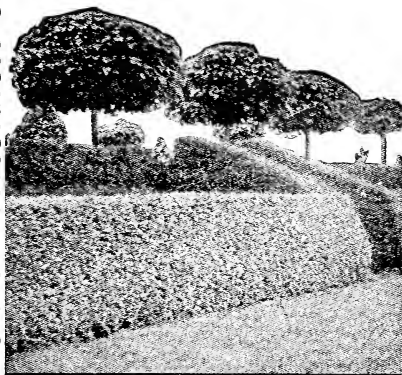

Honeysuckle

Ornamental Trees

NORWAY MAPLE

The Norway Maple for the lawn and street planting has perhaps no equal. It is not a rapid grower, but it makes a compact and symmetrical top with spreading branches giving the finest of shade and protection from the sun and wind. A universal favorite among shade trees. Price, good 8 to 10 ft. trees, \$3.00 each.

Catalpa Bungei Trees

NORWAY POPLAR

For quick shade and rapid growth plant the Norway Poplar. Develops into a beautiful, tall, well shaped tree at an early age. Price, 8 to 10 ft., 75c each.

CATALPA BUNGEI

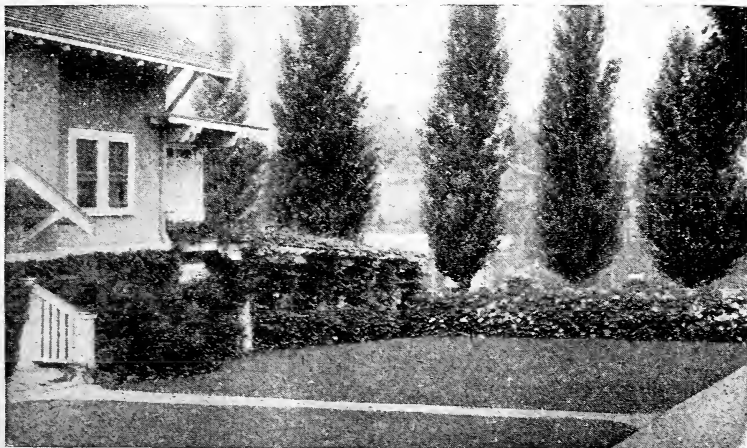

(Umbrella Catalpa). Grafted on stems 6 to 8 feet high, it makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates. Leaves large, glossy, heart-shaped, deep green; lie like shingles on a roof; always making a symmetrical shade. One of the most unique trees, a valuable acquisition for lawn, park and cemetery planting. Price, 6 to 8 ft., \$2.00 each.

AILANTHUS

(Tree of Heaven). Thrifty tree of quite rapid growth. Very desirable where smoke or other adverse conditions injure the growth of other kinds of trees. Price, 8 ft. trees, \$1.00 each.

SILVER MAPLE

(Soft Maple). A well known shade tree, quick growing and develops large oval head. Price, 8 ft. trees, \$1.50 each. Special Price on 6 ft. trees, 75c each.

Volga Poplar

Upright in growth, valuable for planting along driveways, boundary lines, in the background and as a screen. The accompanying photograph illustrates very plainly the beauty of the Volga Poplar. It is a very rapid growing tree and will furnish almost immediate effect. The Poplar are the best trees to plant with the slower growing kinds. Their rapid growth will furnish quick shade and as the permanent trees attain good size the Poplar may be removed. Fine trees, 6 to 8 ft. Price, 75c each.

A Good Shrubbery Planting—Volga Poplar Trees in Background.
Hydrangea Arb. Flowered Hedge as Border of Lawn.

FULGHUM OATS

Fulghum is a strain of awnless red oats; matures very early. In a nine-year test at the Ohio State University Fulghum outyielded the best of the thirteen varieties tested by 8 to 10 bushels per acre. The straw is stiff, taller than the average and produces a good crop in dry and adverse seasons when other varieties are practically a failure.

Productiveness, probably more than any of its other good qualities, has contributed to the wide popularity it has attained. We have reports of crops of from 70 to 94 bushels to the acre, a yield that any other oat will find it hard to beat. They stool out splendidly, have large, full heads, fine plump grains and strong straw.

This 1927 season was unfavorable to most varieties of Oats but our Fulghum produced the best lot of seed we have ever had, 65 to 90 bushels per acre on our own fields. Test 35 to 36 right from the machine. We believe it to be the best feeding oats grown and to contain more food value than any other. Ask the man who raised Fulghum Oats this year. He harvested heavy oats and a good crop. The same will be true nine out of ten seasons. Price, per pk., 35c; per bu., \$1.00; 10 bu. lots, 90c. Special prices on quantities.

SWEET CLOVER

WHITE BLOSSOM

Will grow in any part of the United States and will thrive in poorest sandy soil where no other kind will grow. Ranks first of all clovers to enrich your soil. Sweet clover sown in the Spring can be cut for hay, and same in Fall. Sow it in your corn at last plowing. Wonderful as pasture second year. Has great food value as well as being the greatest soil builder. The seed is very reasonable in price and you can not afford not to sow some at least. See Enclosed List for Price.

YELLOW BLOSSOM

A biennial similar to white except growth is not so strong, stems are finer and a more abundant supply of leaves are produced. Makes finer grade of hay. See Enclosed Leaflet for Prices.

White Sweet Clover

Fulghum Oats

Alfalfa

ALFALFA

NORTHWESTERN GROWN SEED

Heaviest producer of the best hay known. Will yield greater returns for the money expended than any other crop you can grow. Alfalfa is a wonderful soil builder. Good profits come from its use as pasture for hogs.

FOR MILK COWS THERE IS NO OTHER HAY THAT WILL EQUAL ALFALFA TO KEEP UP THE FLOW OF MILK. IT IS HIGH IN PROTEIN AND THUS WILL AID MATERIALLY IN BALANCING THE RATION.

Alfalfa is one of the most profitable farm crops for three reasons: The tonnage per acre which it produces, its value as a feeding crop, and its soil enriching properties, Alfalfa is no longer an experiment, but it has been grown under greatly varying conditions of soil and climate with wonderful success.

Northwestern seed is the hardiest, strongest grower, and cleanest seed you can secure. The lot we offer is the best we have ever seen. We furnish Verified Origin Seed free from weeds and carefully analyzed and tested. Write for samples. See Enclosed Leaflet for Prices..

GRIMM ALFALFA

This seed is generally sown where there is trouble in pulling from severe freezing and thawing. This variety is a general favorite in many sections. The Grimm generally produces a spreading or crown type of root system that anchors it firmly in the soil. It is said by many that a field of Grimm will outlast other strains. Our seed comes in sealed bags of Verified Origin seed. Write for samples. See Enclosed Leaflet for Prices.

FULGHUM OATS

Best nurse crop for Clover, Alfalfa and other grass crops. It ripens with wheat and comes off the ground two weeks before ordinary Oats so the grass gets a good start before the dry weather and hot sun of July. For high yield and early maturing Fulghum has no equal. See Page 30.

Inoculate WITH NOD-O-GEN

PLANTS
INOCULATED
WITH
NOD-O-GEN

(BELOW)
NOT
INOCULATED

For Legume Crops

The cheapest and easiest way of improving crops and soil.

The Legume crops when not inoculated rob the soil; inoculated with the right bacteria, they feed the soil, grow more vigorously and contain a higher percentage of valuable feed proteins.

Nod-O-Gen Easiest and Surest Form of Inoculation

Nod-O-Gen is a scientific pure culture of root nodule bacteria, prepared on special food jelly in bottles with patent stoppers which permit the bacteria to live and breathe and maintain their vigor. Each culture contains plenty of bacteria to inoculate the quantity of seed marked on the bottle. The cost per acre is very small.

Moreover Nod-O-Gen is easiest inoculation to use, requiring no equipment or experience. Takes only a few minutes. Complete directions on every bottle. Results are sure.

Prices for Nod-O-Gen

For Alfalfa, Sweet Clover, Red Clover and other Clovers (specify which):
 1/2 bu. size \$.60
 1 bu. size 1.00

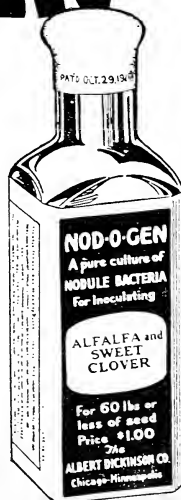

For Soy Beans, Cow Peas, Field Peas and Beans and Vetches (specify which):

1 bu. size \$.50
 5 bu. size 2.00

For Garden Peas, Sweet Peas, Garden Beans and Limas:

Garden Size \$.25

Always specify names of crop as well as size of culture wanted.

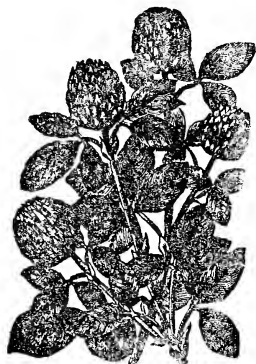

Medium Red Clover

The value of this great clover need not be emphasized for it is recognized as the greatest of the legumes. It is lower in price and you will profit greatly by sowing it this season. Our seed is certified by the Federal authorities as to origin and thoroughly analyzed and tested. Be sure of your seed. Many failures have been due to poor seed. See Enclosed Leaflet for Price. Write for Sample.

MAMMOTH (SAPLING) CLOVER This variety is an enormous yielder of hay of excellent quality, is strong grower and preferred by many growers of the clovers. See Enclosed Leaflet for Price.

Medium
Red
Clover

Alsike Clover

ALSIKE

ALSIKE CLOVER Much like red clover except has white blossom, is not so tall and finer stemmed. Seed is smaller and goes farther—sure catch and less liable to freeze than red clover. Many sow mixture of red and alsike. We can verify origin of all of our seed and have only one grade, which is best we can possibly secure. See Enclosed Leaflet for Price.

TIMOTHY SEED (Pine Tree Brand). Certified and in sealed bags. This seed is cheap and our lot is clean, bright and 99.65 per cent Pure. Sow only the best always. Price, per bu., \$2.75.

MIXTURE OF 20% ALSIKE & 80% TIMOTHY Clean and good quality seed. We have only a limited amount and are offering at bargain price. Per pk., \$1.50; \$5.00 per bushel of 45 lbs.

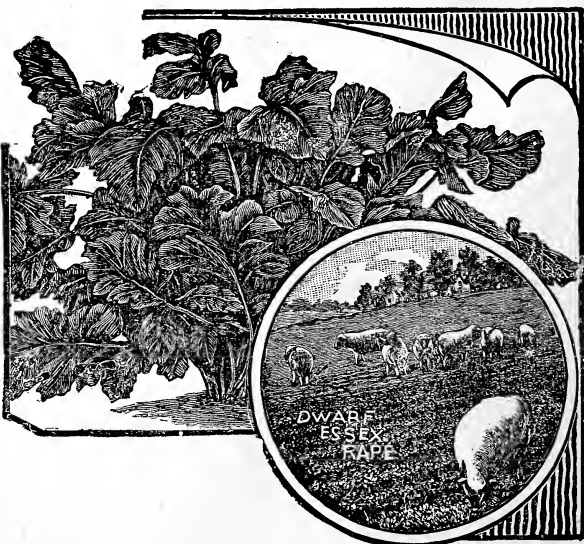

SEND US COMPLETE LIST OF
SEED YOU WILL NEED AND

Cane Seed, Buckwheat, Sweet Corn, Lawn Grass and Pasture
Mixtures. We carry everything in seed line. See our
Guarantee, Page 35.

DWARF ESSEX RAPE

Dwarf Essex Rape is a pasture plant for all kinds of live stock—sheep, cattle, and swine; and is most valuable for fattening sheep. It should be sown early in spring. As it grows very rapidly, the pasture will be ready in five weeks from the time of sowing. Unlike other forage plants, rape can be sown at any time during spring and summer, so a good pasture may be had whenever it is needed. Dwarf Essex Rape will prepare sheep and hogs for market better and in less time than any other forage plant.

It may be sown in corn when this is cultivated the last time. Good results are generally obtained for late fall pasture when Dwarf Essex Rape is sown after the spring grain has been harvested. When sown broadcast, 5 to 6 pounds may be sown per acre. Price, pound, postpaid, 20c; prepaid, 10 pounds, \$1.50. 100 lbs., \$10.00, by express, not prepaid. Subject to market changes... Write for special price on larger lots.

SOY BEANS

PLANT SOY BEANS FOR HAY. Yields 2—2½ tons per acre, finest quality, with food value equal to alfalfa. Stock relish it and do well on it. Put Soys in every field of corn you are going to hog down. They contain the cheapest protein food you can possibly buy, experiments show it is equal to oil meal. Plan to take advantage of your waste ground and plant a few Soys this spring. They are a Legume and rank with clovers as soil builders. It will pay you well.

ITO SAN

The Ito San is one of the oldest varieties of Soy Beans in common use today. It is a yellow-seeded variety of a branching type, grows 28 to 40 inches tall and ripens seed in 95 to 100 days. This variety, though not as high a yielder of seeds as resistant to shattering as the Manchou, may be used for hogging-down with corn in latitudes similar to Northern Ohio. Though making a rather light tonnage, the Ito San is recommended for early hay by many. Price, peck, 75c; bushel, \$2.50.

MANCHOU

A promising variety that is making good wherever planted. It is one of the highest yielders of seed, grows erect from 36 to 48 inches tall and carries an abundance of foliage which it sheds almost perfectly when ripe. The Manchou has medium sized seed of a yellow color with a black or brown seed-scar. It matures in 100 to 105 days and is one of the most resistant varieties to shattering. It is unexcelled as a variety to plant with corn for hogging-down when corn of 100 to 120 days maturity is used. Price, peck, 75c; bushel, \$2.50.

WILSON

A medium sized black bean of unusual qualities, wonderful hay bean, grows very prolific with many leaves. Is heavy yielder of beans and a variety we recommend very strongly. Plant a few of these beans in the corn you put in the silo. Price, per peck, 75c; per bushel, \$2.75.

VIRGINIA

A brown-seeded variety having a twining tendency, maturing in 125 to 135 days, adapting it only to southern parts of Ohio and similar latitudes and recommended for use with corn in Southern Ohio to those who desire a twining bean for ensilage. When grown alone the Virginia lodges and intertwines, making it difficult to harvest or cure. Price, per peck, 75c; per bushel, \$2.75.

Write for Special Spot Cash Price on Soy Beans when ready to buy and we will quote you lowest market price.

IMPORTANT—Be sure to inoculate all Soy Bean Seed. It will double your results.

SEMESAN SEED DISINFECTANTS

The Semesan disinfectant family, comprising Semesan for general crops, Semesan Jr. for corn, and Semesan Bel for potatoes, has proved to be the grower's solution of the disease hazard in farming.

Semesan provides the one effective method of controlling many seed borne diseases. It is being used with wonderful results in all sections of the country on grains, field crops, vegetables, flowers and ornamentals.

Semesan is easily applied—either as a dust or liquid at a cost of only ¼c to 1c per pound of seed. The cheapest crop protection you can buy.

Semesan, Jr. is used as a dust disinfectant to control the ear, root and stalk rots of corn. In tests conducted in both Illinois and Iowa by the Federal and State Governments, Semesan, Jr. increased yields from diseased seed by varying amounts up to 38%. These tests confirm the experience of other agricultural experts and practical farmers who report corn crop yields

from Semesan Jr.—treated seeds of 20 to 40% or more.

Semesan Jr. is applied only as a dust, at the rate of 3 ounces per bushel of seed. The cost therefore ranges from only about 4c an acre of field corn to 6 or 7c per acre of sweet corn.

Semesan Bel is used especially for the seed disinfection of white and sweet potatoes. It has the remarkable property of destroying many disease germs and at the same time stimulating seed pieces to speedy germination, healthy growth, early maturity and the protection of larger crop yields.

Semesan Bel is applied to whole or cut seed pieces as a whitewash-like mixture by adding the proper amount of water, by the instantaneous dip method. One pound treats from 16 to 20 bushels of whole or cut seed.

Ask for free booklets on crops in which you're interested.

Velvet Barley

New Variety—Long Awns but Smooth as Velvet—Yields as Heavy or Heavier than Bearded Varieties—Disease Resistant.

This wonderful new variety was originated at the University of Minnesota and so popular has it become that it is next to impossible to get seed out of that State. Only through strenuous efforts were we able to get a small quantity in 1927 and we are offering a limited supply this Spring, 1928, that our customers may get a start of this exceptional variety.

A six rowed Barley—stiff straw—note the long heads in picture on right—Has long awns but smooth as velvet—Yields as much or more than Beardy varieties—handles like oats—Do not fail to try a small acreage at least—Our supply is very limited. Our seed is pure, was grown from certified seed. Price, per peck, 75c; per bushel, \$2.50.

WISCONSIN PEDIGREED SPRING BARLEY

The best of the bearded spring varieties of Barley. It has won more prizes than all other varieties combined. The average yield in Wisconsin for the last five years has been 36½ bushels. It has a plump grain, stiff straw, large, well filled heads. It has won prizes at all International Shows of recent years.

Wisconsin Pedigreed Barley is one of the highest yielding varieties of best feeding quality grain. The straw grows tall and stiff. A wonderful barley and you make no mistake in planting a large acreage of it. Barley is almost equal to corn in feeding value. Price, per peck, 50c; per bushel, \$1.25, 10 bu. or over, \$1.15 per bu.

Write for prices in larger quantities.

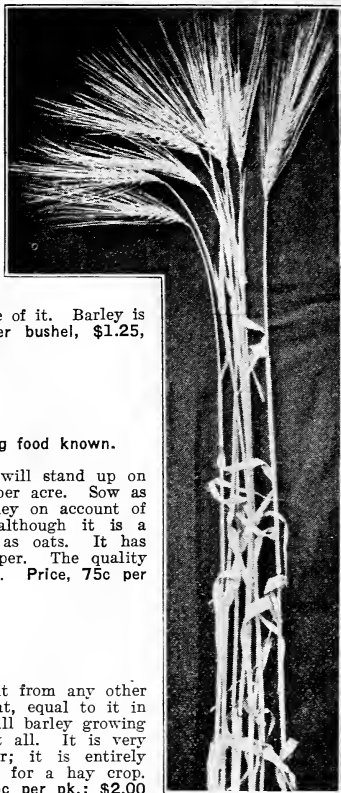

BEARDLESS BARLEY

This is a great stock food and fat producer. Is best egg-producing food known.

Straw about the height of common barley, but is stiffer, and will stand up on any land. With good land and season it has produced 80 bushels per acre. Sow as early as you can; frost does not hurt it. Many will not grow barley on account of the long, harsh beards which are so disagreeable in threshing, although it is a profitable crop. This is beardless and easy to grow and handle as oats. It has hulls like the Manshury or any other variety, and is a heavy cropper. The quality is excellent, both for maturing and for feeding hogs and other stock. Price, 75c per peck; \$1.75 per bushel.

WHITE HULLESS BARLEY

No beards or Hulls. Great for Feed. White Hulless is different from any other barley. The grain looks like wheat. It is almost as heavy as wheat, equal to it in feeding value, and will yield nearly twice as much. It succeeds in all barley growing regions, and also in sections where common barley is not grown at all. It is very early, thus making a splendid nurse crop for seeding with clover; it is entirely beardless, with soft straw, splendid for feed. Many farmers cut it for a hay crop. It is especially fine for poultry and for grinding for hogs. Price, 75c per pk.; \$2.00 per bu. of 48 lbs.

Our 1927 Field of Velvet Barley—Note the long straw and big shocks.

SEED POTATOES

We will be glad to quote you special prices on seed potatoes in season. We can offer you Seneca Beauty, one of the best table potatoes grown, Irish Cobbler, Early Ohio, Petosky and Early Triumph.

Write us, we can save you money.

SCARFF'S

Hand Selected and Racked

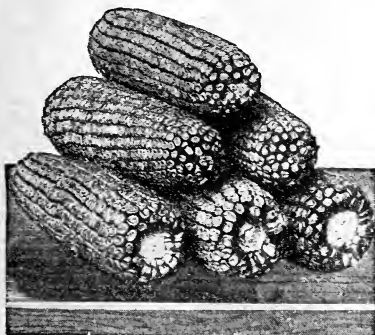

ARTIFICIALLY DRIED

SEED CORN

New equipment in our modern Seed House insures highest possible quality Seed Corn. Air at normal temperature is forced over our corn by special powerful fans after each ear is individually selected and carefully racked. Special new testing and grading equipment permits us to offer as good seed as you can secure anywhere. Our varieties are pure and true to type. Our money back guarantee protects you. We grow annually about 400 acres on our own seed farms and select what we sell with the same care as we select for our own planting. Send us a trial order and increase your yield 10 to 20 bushels per acre. Everyone should grow a pure strain of corn. This is the year to get a change of seed, as \$1.00 invested in good seed may mean a profit of \$10.00 to \$40.00 per acre on your entire crop next Fall.

CERTIFIED SEED

Certified seed is carefully inspected for purity and freedom from disease in the field and tested in the racks or bins for germination by the Ohio Seed Improvement Association. Our Clarage, Woodburn, Reids and Medina Pride are Certified. You can have the special tags on request. No extra charge.

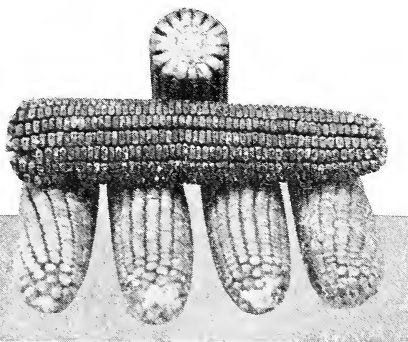

Specimen Ears of Medina Pride

Earliest Varieties Known

Will Mature in 85 or 90 Days

Medina Pride Grown particularly in the Northern Section of Ohio but good any where. Our fields were ripe by August 20th. Fodder medium size and produces good quality corn. Good for early hogging, color light yellow. Our seed is Certified and extra good. Price, per peck, \$1.25; per bushel, \$5.00.

Coil Corn A very deep yellow corn with white cob. Note the exceptionally long ears and deep grains. A general favorite wherever tried. Will mature anywhere. On ordinary season hogs may be turned in a field of this variety last of July. Don't fail to plant a small field of Coil Corn. It will surprise you. Price, per peck, \$1.25; per bushel, \$5.00.

Specimen Ears of Coil Corn

Money Refunded If Not Satisfactory on Arrival

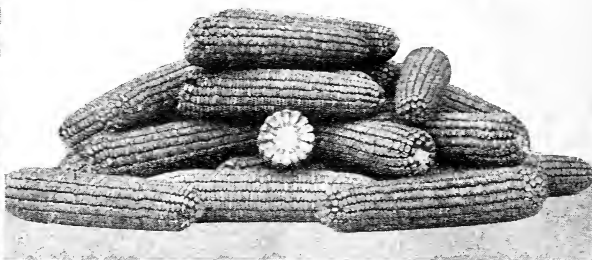

Test our Seed any way you wish for 10 days after arrival, and if not entirely satisfactory you may return it and your money will be refunded without question. Be it understood, however, that we are in no way responsible for the crop, as so much depends upon season, condition of soil, manner of planting, etc., that no one can do this. No claim considered or allowed after 10 days from arrival. This applies to all farm seeds, and the rule will be strictly adhered to.

Yellow Clarage

HOLDS WORLD'S RECORD FOR YIELD

168 BUSHEL PER ACRE ON 10 ACRE LOT

This variety is a general favorite wherever grown, especially does it appeal to those who like to produce show corn. It has been so carefully bred that every ear is of the same type exactly and in so breeding the ability to produce has been very greatly increased. Wherever grown it has established record yields of good solid corn. It is easy to husk and one of our very best feeding corns. A load of Clarage will outweigh almost any other variety.

Yellow Clarage Corn

The above lot of specimen ears were selected from a load of our 1927 crop of Clarage and photographed a few days before we sent in our Catalog copy. Note the uniformity of the ears as well as the size and depth of grain. Our strain has produced many prize winning samples and we know it will prove a profitable investment for you to plant one field at least to Clarage. We grew more Clarage in 1927 than any other one variety.

The stalks of Clarage on the left were photographed while the corn was yet in the milk. Note the heavy foliage which insures excellent fodder, the nice sized stalk and well placed ears. You will like this variety. Price, per peck, \$1.25; per bushel, \$5.00.

Blue Clarage

Ideal for hogging off—will mature in 85—90 days and has very sweet taste. Is used for sweet corn* in many localities. Ears are large and grains deep and broad. The stalks are only medium height and will average one and one-half ears per stalk. It is a very vigorous grower, hence will stand planting earlier than most any other variety. Our strain is deep blue color and very pure. We recommend it as one of the best, exceptionally early varieties. Price, per pk., \$1.25; per bu., \$5.00.

Blue Clarage

Specimen Stalks of Clarage

Scarff's White Cap

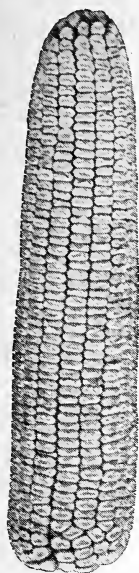

For Poor Land

INSURE YOUR CORN CROP BY PLANTING OUR SPECIAL STRAIN

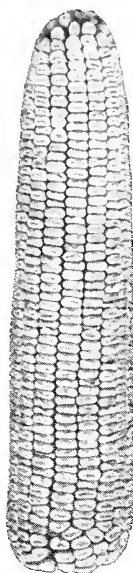

No other corn on earth will produce more bushels of good solid ears on thin land than our special strain of White Cap. For over thirty years this variety has been grown by us, and no pains spared to improve it for the special purpose of high yield and well-developed ears. It not only yields well on thin land, but responds to high culture and rich soil as any other corn. It will do well on either clay or black soil and every farmer should grow one or more fields of this variety to insure against crop failure. The ears are large, slightly tapering, averaging about 10½ inches long. Grain has white cap and yellow body; moderately deep and well filled over surface of cobs. Stalks with plenty of blades, making excellent fodder.

WHITE CAP YELLOW DENT

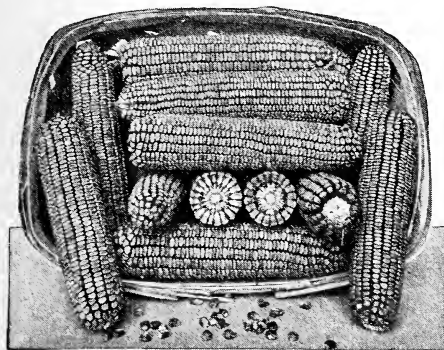

Comprises more good points than any other variety, being suitable to all climates and soils. It matures in 100 to 110 days. As the name implies, it is a white cap corn—not a white corn, but yellow kernel with a small cob, with moderately deep grains filled out to the very ends. Price, \$1.50 per peck; \$5.00 per bushel.

Ear White Cap
Corn

Ear White Cap.
Corn

Early Mastadon Corn

Early Mastadon

MATURES 100 DAYS—YIELDS HEAVY

This standard variety is one of the most prolific yielders grown. The ears are large, very cylindrical and exceptionally well-filled at both tip and butt. The color is light yellow and the ears mature very early and are solid even before husk dies. We recommend this corn especially for clay soil. This season along with other kinds Early Mastadon proved itself the more thrifty and hardier corn in every way. You can make no mistake in planting a small field of this variety. Our seed is carefully tested, shelled and graded. Price, per peck, \$1.25; per bushel, \$5.00.

Red River

OR RED 90-DAY CORN

This is a White Cap. Very early and popular in the extreme North, also used extensively to replant, as it can be planted as late as July 1st, and make a good, sound crop. If you have to replant late in the season, we know of no variety that will give you any better results than this, for it seems to have the ability to produce a crop when all others fail.

When planted early in season, it matures fully three weeks ahead of the main crop and makes early feed for the hogs and dairy cows. It makes a good yield of fair-sized, sound ears. In an average season it is reasonable to expect a yield of 75 to 80 bushels per acre. The fodder is medium height, plenty of brace roots. If you want some early corn to mature, then try some of this 90-day corn and be convinced of its merits. Good, sound seed stock. Price, per peck, \$1.50; per bushel, \$5.00.

Red River is excellent for the silo and can be cut in August if necessary.

Improved Leaming

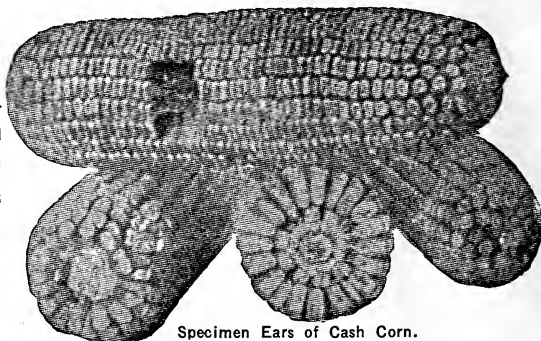

The Leaming is the oldest distinct variety of corn, having been originated in 1826. Our own standard strain is one that gives universal satisfaction over the entire Corn Belt. 100 bushels per acre is not an uncommon yield. The color is deep, rich, golden-yellow; ears very uniform and of medium to large size, well filled at butt and tip ends. Grains are deep, broad and tapering, well set on the cob. Length of ears 8 to 11 inches, 7½ to 8 inches in circumference, weighing 12 to 17 ounces each. Each ear has 16 to 24 rows of kernels, with but little space between rows. This is an all-around feeding corn that puts on fat, and the kind that fills your cribs each season.

"No matter who you are or where you live, if you handle live stock and raise all or part of the corn you feed, you can materially increase your profit by growing our Standard Leaming." Price, \$1.50 per peck; \$5.00 per bushel.

Scarff's Cash Corn

THE BEST FEEDING CORN GROWN

DEEP GRAINS, SMALL
COB AND SOLID CORN
EVERY YEAR IF YOU
PLANT CASH. IT'S
ALL CORN.

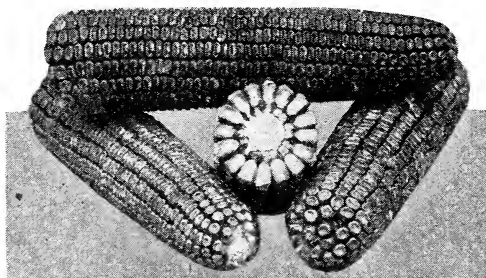

EARLY TO MATURE
AND YIELDER OF
FINEST QUALITY
EARS. WILL MATURE
ANYWHERE IN THE
UNITED STATES.

Specimen Ears of Cash Corn.
Note deep Grain and Small Cob. Will Mature in
90 to 95 Days.

This deep grained Yellow Corn is one of the best of the early varieties maturing good solid—well formed ears—filled at both butt and tip. The kernels themselves are very large and attractive looking and their feed value is very high. It will easily mature in 90—95 days and we have planted as late as June 10th. and had a fair yield of solid corn. It is ideal for early hogging down or in the Corn Borer districts where it is necessary to plant very late. The fodder is medium size having a profuse number of blades with the ears at just nice height to husk. Our men prefer to husk this variety to all others because of the ease in breaking. It is with a great deal of pride and satisfaction that we offer this valuable corn to our customers. We have grown it on our farms for about ten years, and by careful selection we have it as near perfect as any corn we have ever tried. In fact, every one who sees it at once recognizes it as the ideal corn. Your money back if the seed is not satisfactory. That's fair. Try it. As a special favor we ask you to try one field of this corn for your own feeding. It will surprise you how much corn it will yield and the excellent quality. Price, \$1.50 per peck; \$5.00 per bushel; per quart, postpaid, 50c.

Early Mammoth Yellow Dent

NOTE THE DEEP GRAINS

The largest early corn grown—matures in 100 days. It is fully ten days earlier than Reids Yellow Dent and yields more bushels per acre. The fodder is medium large, stands erect and carries ears about 3 to 3½ feet high. This variety is ideal for early ensilage, the exceptionally heavy yield of corn makes especially rich ensilage and the fodder makes good tonnage per acre. It is not uncommon to make yield of over 100 bushels per acre. The ears are large averaging on fairly fertile ground 11 inches in length with 16—18 rows per ear. The grains are deep and broad and cover the cob well at each end. It has great vitality and makes very quick growth. An exceedingly profitable variety to grow on either clay or dark heavy soil. Price, \$1.50 per peck; \$5.00 per bushel.

Our Seed Corn prices are no higher than ordinary seed this spring and our corn was all in our Seed House carefully raked and dried before cold weather. This extra care adds much to the vitality of the seed which means an increase in yield per acre. Be sure of the seed you plant. Our firm is a reliable one. ASK YOUR BANKER ABOUT US.

WOODBURN GOLDEN YELLOW DENT

134.31 BUSHELS CORN PER ACRE, MEN'S 10-ACRE CONTEST

Woodburn
Golden
Yellow
Dent

DESCRIPTION—Woodburn is an early corn maturing 90-95 days with very deep and exceptionally attractive yellow color, very deep large grains on good sized, well formed ears. The stalks are medium size and carry ears at just the right height for husking. It is a thrifty grower and produces an abundance of foliage. You will like this corn.

This variety has become a general favorite wherever planted. We secured our seed stock direct from Mr. Woodburn soon after it was introduced and we have a very fine lot of well-selected seed. If you wish to get a start of this very valuable variety we will be glad to have your order while our supply lasts.

A deep grain, yellow variety of merit. It originated in Champaign County, Ohio, and it has figured prominently in many County and State Corn Shows, scoring in points of ear perfections as well as for high yields. It ripens about the same season as Leaming.

Ears large, well filled with deep grains.

The Woodburn Corn is on every show table and has taken many prizes, besides it is wonderfully prolific, making some high records in Central Ohio. It is used largely by Boys' Corn Clubs and 10-

acre plots. One field planted to this variety will be a good investment. Price, \$1.25 per pk.; \$5.00 per bu.

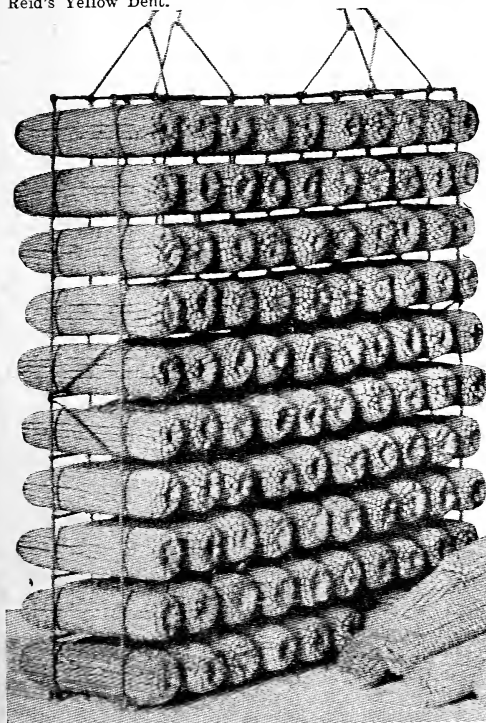

REID'S YELLOW DENT

combined. It is bred to win. If you are interested Reid's Yellow Dent.

OUR PRIZE-WINNING STRAIN. This variety has won more prizes than all other yellow varieties in high-bred corn of prize winning strain, plant

Our prize Winning Strain of Reid's Yellow Dent holds the same relation to the yellow varieties as Johnson County holds to the white varieties; both are prize winners. In the class of yellow corn, Reid's Yellow Dent always carries away the prizes. It is bred to conform with the score card better than any other yellow variety, and makes an almost perfect ear, fills exceedingly well at both ends of the ear. Grains are well dented and set close together on the cob in very straight and well-defined rows. Growers will make no mistake in sending us their orders, no matter whether they grow corn for the corn shows or for market, or for feeding purposes. This variety is one of the most popular of the yellow sorts. A heavy yielder of splendid specimen ears. A crib or load of this corn is a fine sight to see, and pleases the grower as well as swells his bank account. A very heavy yielder. Price, \$1.25 per pk.; \$5.00 per bu.

IN ORDERING REID'S YELLOW DENT

Scarff's Ensilage Corn

**A GOOD WELL-FILLED SILO MEANS
FARM INSURANCE**

The Silo is a fixture on the farm and has come to stay. No matter whether you feed for milk or for beef you must have a silo. It is past the experimental stage. It is actual insurance for the farmer and is the best insurance policy he can hold. It insures against drought and short pasture in the latter part of the season and if your pasture burns up a well-filled silo will keep up the milk supply equal to the finest grass and put on pounds of beef equally as well.

CONNERS PROLIFIC ENSILAGE CORN

YIELDS TWO TO SIX EARS ON EACH STALK

DESCRIPTION. The color of the grain is white, the average length of the ears is 8½ inches, and each stalk bears from 2 to 6 ears. The stalks range in height from 12 to 14 feet, according to season and fertility of the soil.

This wonderful new variety makes an abnormal growth producing an abundance of foliage and a greater tonnage than any other ensilage we have ever produced. It stands up well, is a quick, vigorous grower and beyond doubt, the best ensilage variety you can grow. If you have grown it you will want it again this year, if you have not as yet tried this kind you cannot afford not to plant at least a portion of your field and notice the difference.

PRICE OF CONNERS CORN. Sample packets, 15c; quart, 60c, parcel post, prepaid. By freight or express, not prepaid, peck, \$1.50; bushel, \$5.00. Shelled only.

REID'S YELLOW DENT ENSILAGE

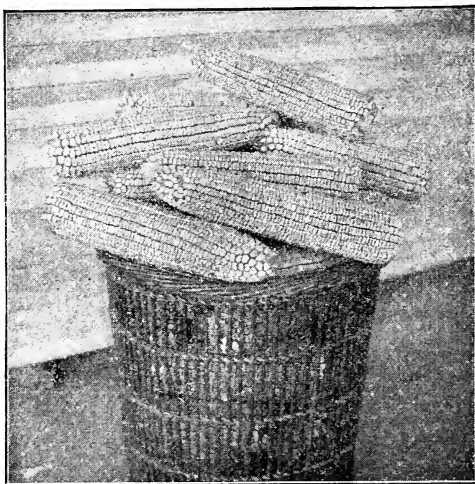

We have developed a late maturing variety of Reid's Yellow Dent that we are proud to tell you ranks with the very best of the ensilage varieties. The ears are very large which will insure an abundance of corn. The foliage is dense and you will be surprised, the small acreage that will be required to fill your silo. Nor is it too late to mature for you in the ordinary year. It has the same identical description as given on Page 37, except it is a few days later in maturing. Price, per peck, \$1.50; per bu., \$5.00.

JOHNSON COUNTY WHITE

Corn pure white and cob same color. The ears run from 10 to 11 inches in length and about 8 inches in circumference. The stalks make a good vigorous growth, well braced with a good system of brace roots, capable of withstanding severe wind storms, as well as drought. It is a variety very rich in protein, hence valuable for feeding purposes, also valuable for silo, as it makes as much fodder as the regular ensilage corn and so much larger proportion of ears, hence a much richer ensilage.

THE VARIETY THAT SENDS OUR BOYS TO WASHINGTON

Price, fine Seed Stock: quart, postpaid, 50c; \$1.75 per peck; \$5.00 per bushel.

A Basketful of Johnson County Ears Grown from the 10 National Sweepstakes Ears

Ensilage Corn

**The Most Beautiful
Dairy Cow
and one of the
Heaviest Milkers**

We are just beginning to realize the value of the Ayrshire as an ideal dairy cow. Our herd has been established five years and each season we are more firm in the belief that she carries more qualities that make her desirable and profitable for the general farmer or family than any other herd of dairy cattle. We have put them under only ordinary conditions and they have paid a profit on the investment. They will do the same for you. We have established our herd upon very popular and heavy producing blood lines and the individuals we have are good ones. We are offering some young stock now and are sure our Ayrshires will please you. **Calves 3 months old, \$60.00 each; Yearling heifers, \$100.00 each; Bred heifers, \$125.00 each.**

HAMPSHIRE DOWN SHEEP

Our flock consists of One Hundred registered Hampshire Ewes. We purchased our foundation stock from the Walnut Hall Farms, Donerail, Ky., where the best individuals and most noted blood lines have been mated and some of the best individuals of the Hampshire breed produced. Many of their Rams were imported and the Walnut Hall Farms are known everywhere for the quality of stock they produce. We personally visited the farm, selected 50 Ewes from their entire flock which constitutes our foundation stock.

The lambs mature and develop into marketable size very young. They put on pounds very fast and are easy kept. They are very prolific and our experience has stamped them as one of the best for the general farmer.

We are offering some young stock, described fully in our **Live Stock Leaflet which is free. Write for it.**
